

Voter Survey application web page is shown here. Now click on the sign-in button.

1.Register:

On this sign-in page, new users can easily create a new account by providing their required information, which includes their name, email address, password, and phone number. Once they have filled in these details, they can proceed by clicking on the "submit" button. After doing so, the registration process for a new account is completed, and an alert message is sent to the user's email address to confirm the successful creation of their account.

1.2 Mail Activation: -

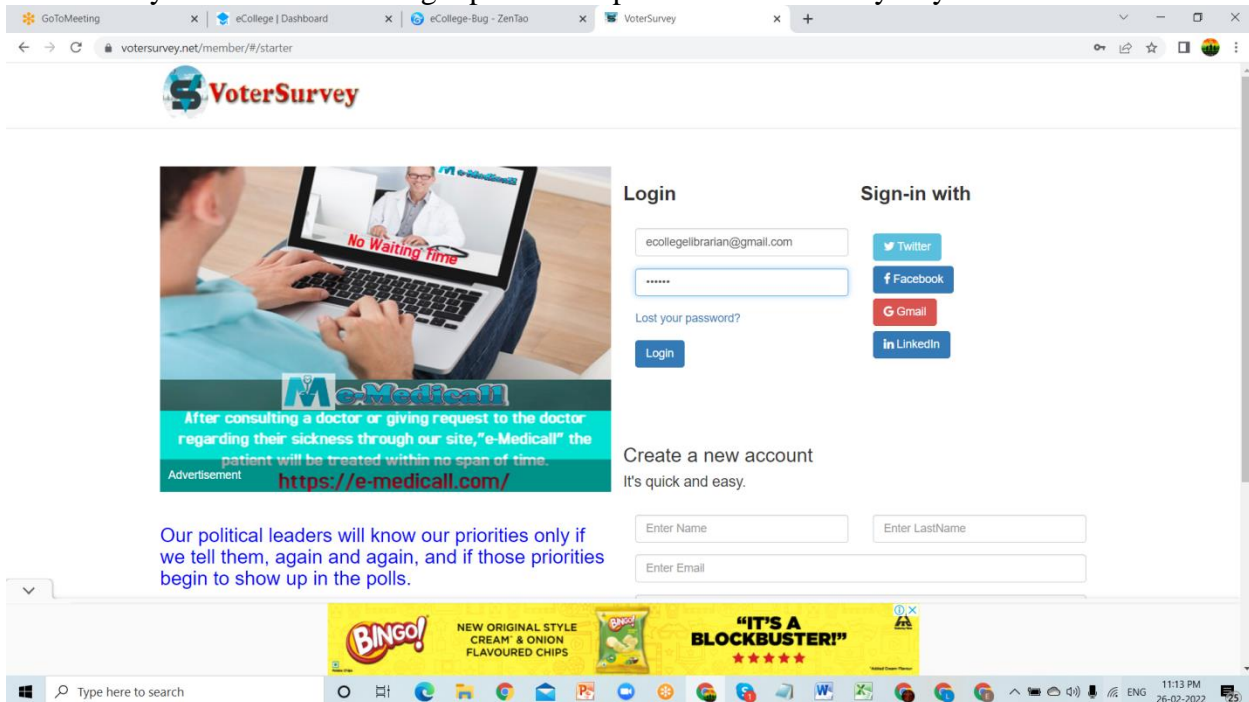

After completing your account registration, a message will be sent to your inbox with instructions to activate your account. The message will typically include a link or button that says something like "Click here to activate." Activating your account is a crucial step, as you will not be able to sign in or access your account until it has been activated through this process. This extra layer of verification helps ensure the security and validity of user accounts on the platform.

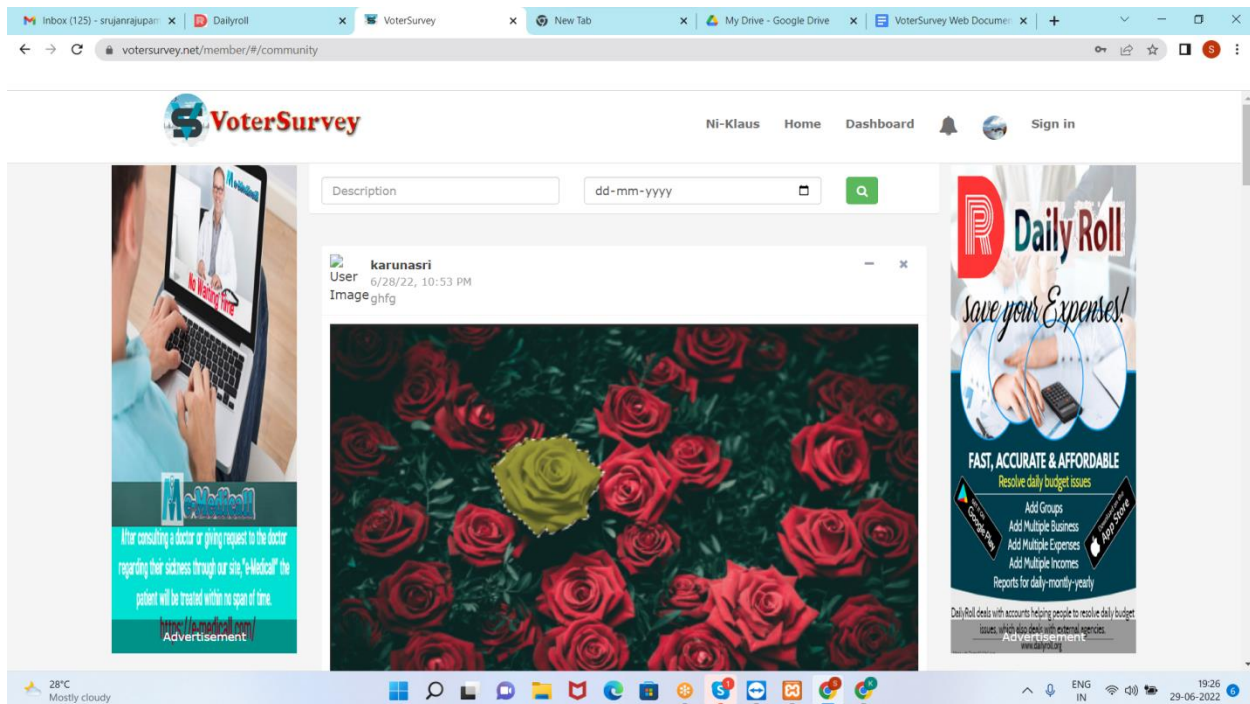

2.Login: -

Once your registration is successfully activated, you can proceed to log in by entering your registered email address and password. Upon entering the correct credentials, you can click on the "login" button. If the login is successful, you will be directed to your account's community page. However, if the login is unsuccessful due to incorrect credentials, the login page will be displayed again. In this case, you will need to enter the correct password to log in successfully and access your account. This login process helps ensure the security of your account and data.

2.1. HomeTab: -

The home page of the application will show you the name, home, dashboard, notification icon, profile image icon, and sign in buttons on the first community page once you are logged in.

Home tab

When you open the application, you'll first encounter the header on the community screen. Following that, there is a video from Spain that provides information about the community.

Home tab-2: -

Continuing on the same community screen, you will find options to comment on posts and set preferences. If there is a community event, clicking on it will open the event page, allowing you to access event-related information and details.

When the event is open, you will typically find options to like the event and share it as a favorite. Additionally, there may be a comment option to engage with others and discuss the event. These features enhance the interactive and social aspects of the event within the application.

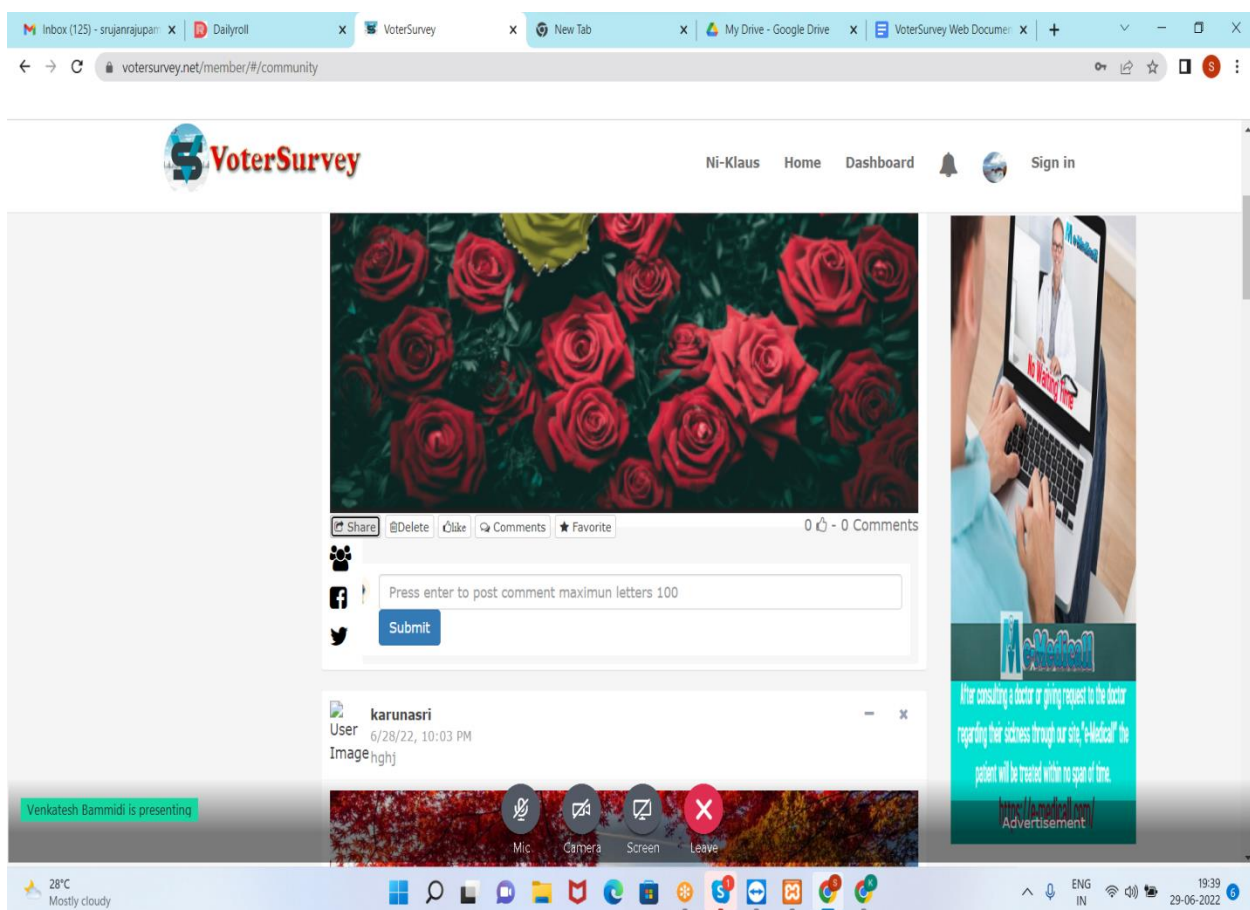

Certainly, when you like an event within the application, the like count will typically increase to reflect the number of users who have expressed their appreciation for the event. This feature allows participants to see the popularity and level of interest in a particular event within the community.

If you dislike an event or user, you can choose to either delete it or block the user. You can also share the event on social networking sites like Facebook or Twitter. If you mark it as a favorite, it will be saved for future reference on your profile.

Additionally, you can click on "Next Comment" to leave your own comment on the event. Subsequently, any comments made by other users on the same event will be visible to you, allowing for a discussion and interaction around the event.

Following the previous functionalities, the application provides a search option. When you use the search feature, a page opens where you can input specific criteria and date preferences into the search box. You can select both the date and criteria to narrow down your search for open events.

Furthermore, you have the ability to enter new data to update or modify existing information and correct any inaccurate statuses related to events or criteria within the application. This feature allows for better organization and management of event data.

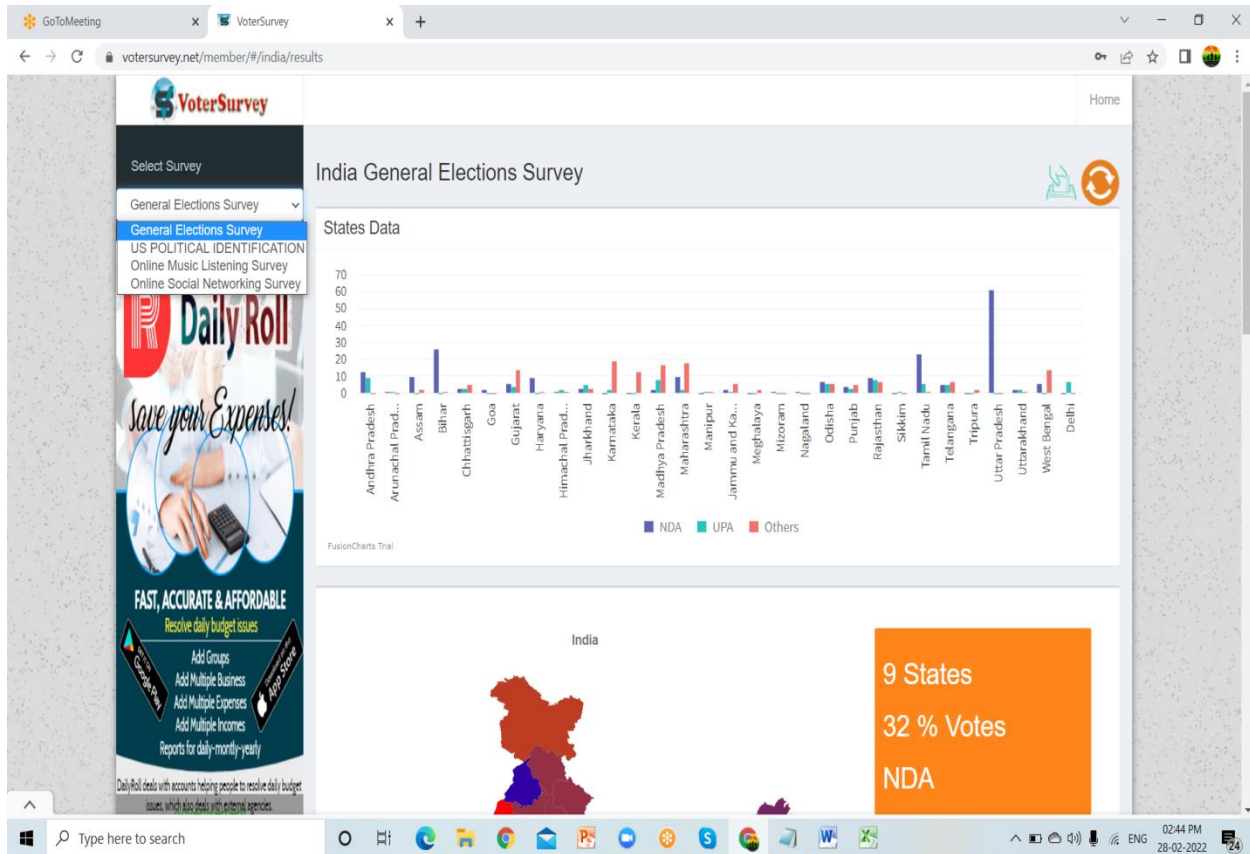

Dashboard: - When you click on the "Dashboard" button in the application, you are directed to the dashboard screen, which includes features related to surveys and general election voting.

1. **Survey Voting:** This section allows users to participate in surveys, which can provide nationwide results. Users may answer survey questions, and the collective responses contribute to the overall survey results.

2. **Statewide Results:** Within the survey voting section, users have the option to select a specific state in the country. When a state is chosen, the dashboard displays the survey results for that particular state. This enables users to see how many votes the survey has received from residents of that state.

3. **Voting Points:** In the survey voting section, there is a concept of "voting points." These points are derived from the votes users provide in the survey and are used to determine the overall survey result. The more votes a particular option or answer receives, the higher its voting points, which influences the survey outcome.

Overall, the dashboard provides a comprehensive view of survey participation and results, including nationwide and state-specific data, as well as the significance of voting points in determining the survey outcomes. This information can be valuable for users interested in survey data and general election voting within the application.

General election voting: -

In the dashboard of the application, the first thing you encounter is the overall statewide result for the entire country. This provides an overview of the current status or outcome at the national level.

Next, the dashboard includes options for general election voting, which encompasses the following components:

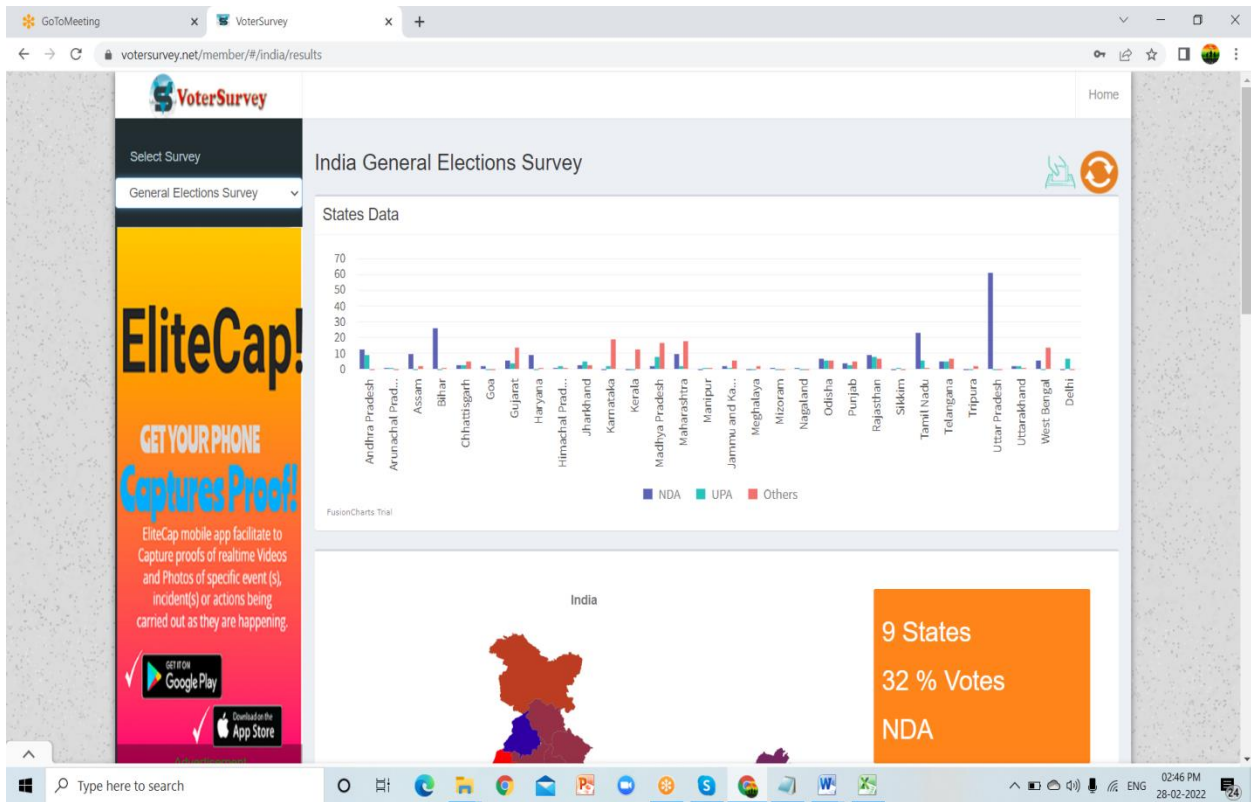

1. ****State Board Result:**** This section likely displays the election results for various states. Users can select a specific state to view its election outcome.
2. ****National Result:**** Users can access the national election results, providing an overall picture of the election outcome for the entire country.
3. ****Voting Points:**** Voting points may be a metric used to gauge the significance or weight of individual votes in determining the election result.

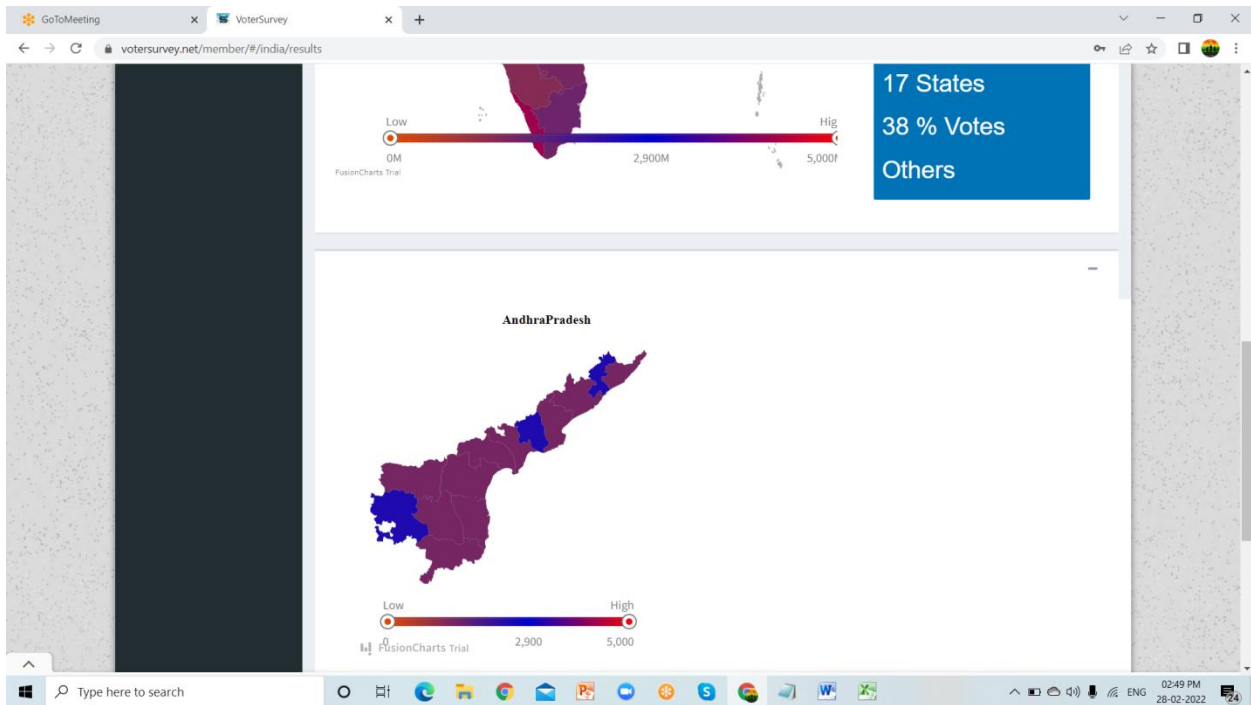

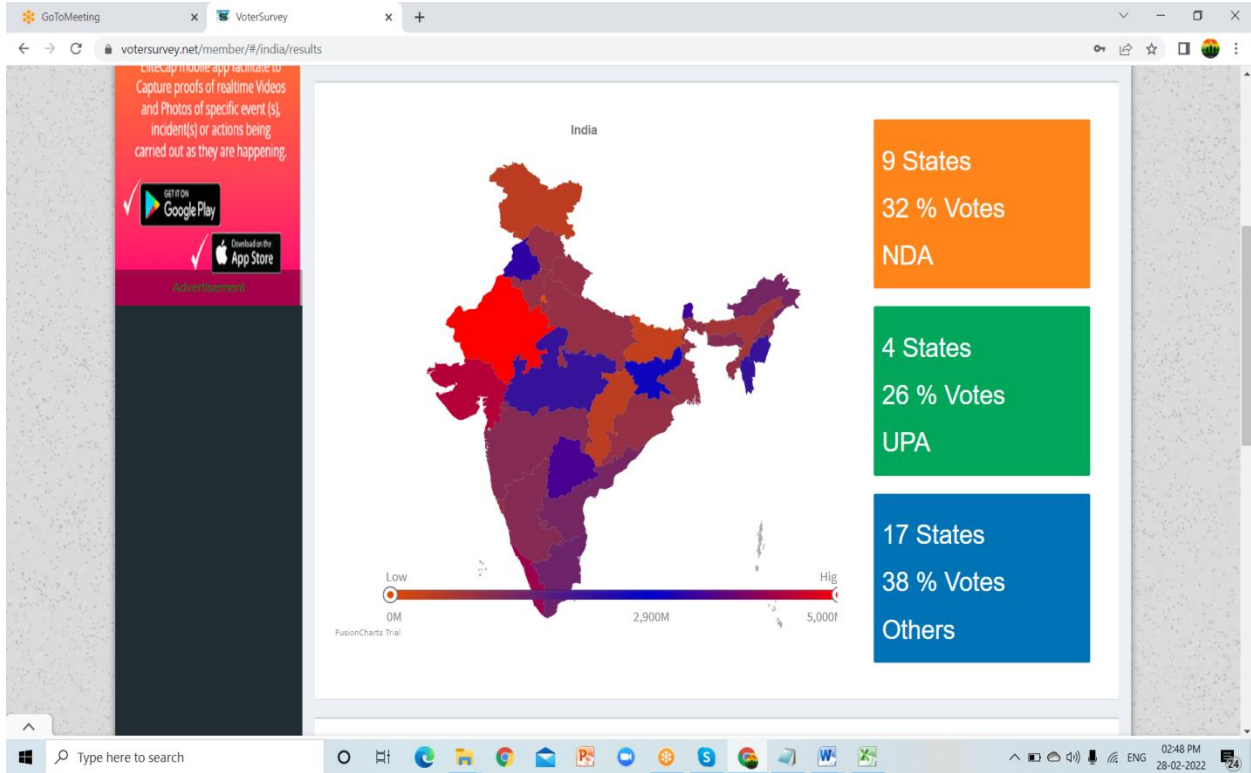

Additionally, within the general election voting section, users have the ability to drill down for more detailed information:

- **Selecting a State in Nationwide Result:** Users can choose any state in the nationwide result to view the election outcome specifically for that state.

- **Selecting a District in Statewide Result:** Similarly, if users select a particular district in the statewide result, they will be presented with the election outcome at the district level, often referred to as the District Vice result.

This comprehensive dashboard structure allows users to access election data at various levels, from nationwide results to state-specific and even district-specific outcomes, providing a detailed and informative view of election-related information within the application.

Note: -

"Voting" is the voting point where you can vote by selecting the members of that party in the voting point.

You can click on the comment box next to it and let us know your opinion on why you cast your vote in that comment box.

In India What voting is like in India, however, is that by clicking on the vote, selecting Select District and Select Sub-District and MP Area or MLA Area, you can select and vote for the party of your choice.

You can click on the comment box next to it and let us know your opinion on why you cast your vote in that comment box.

The screenshot shows a web browser window with the URL votersurvey.net/member/#/india/mobpollsIN. The page features a navigation bar with the "VoterSurvey" logo and a "Home" link. Below the navigation bar, there are several dropdown menus for selecting a survey (set to "General Elections Survey"), a phone number (9087654321), and geographical locations (East Godavari, Rajahmundry Rural, and Rajahmundry). The main content area is titled "India General Elections Survey" and includes a bar chart icon. A large advertisement for "EliteCap!" is on the left, and a "NatureSnap Mobile Photography Contest" advertisement is in the center. On the right, there is a list of political parties with their respective symbols: INC (hand), BJP (lotus), CPI (sickle), TDP (bicycle), YSRCP (spear), JSP (cup), CPM (sickle), and BSP (elephant). Below the party list, there are tabs for "MLA Voting", "MP Voting", and "Comments". The Windows taskbar at the bottom shows the search bar, system tray, and the date/time (03:16 PM, 28-02-2022).

Fusion chart: -

2.2. Profile: -

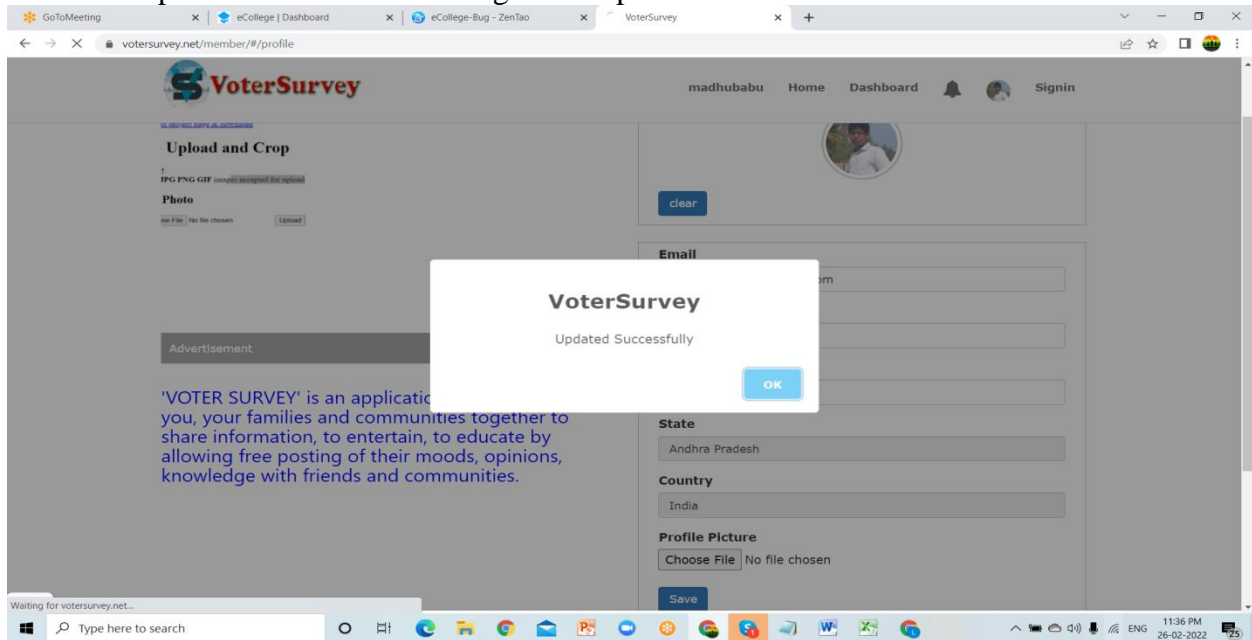

Within the application, you have the convenience of viewing and updating user profiles. You can easily access and modify your own profile. Additionally, there is the option to add a profile photo to enhance your profile's personalization and visual appeal. This feature allows users to manage and personalize their profiles with ease, making it a user-friendly and customizable experience.

2.2.1. Update the profile: -

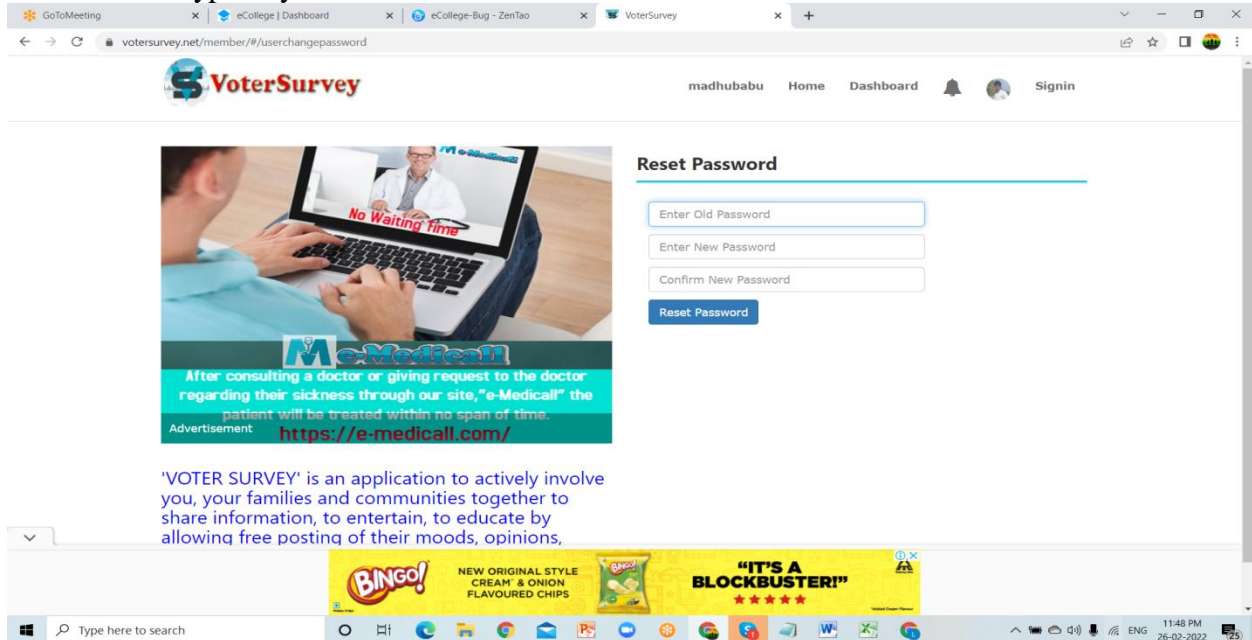

In the application, users have the flexibility to easily update and modify their profiles. You can make changes to any field or information present in your profile, and this includes the ability to change your profile photo. This user-friendly feature allows individuals to keep their profiles up-

to-date and personalize them according to their preferences and needs.

2.2.2. ResetPassword: -

In the application, the process of resetting and updating your profile password is straightforward. Here's how it typically works:

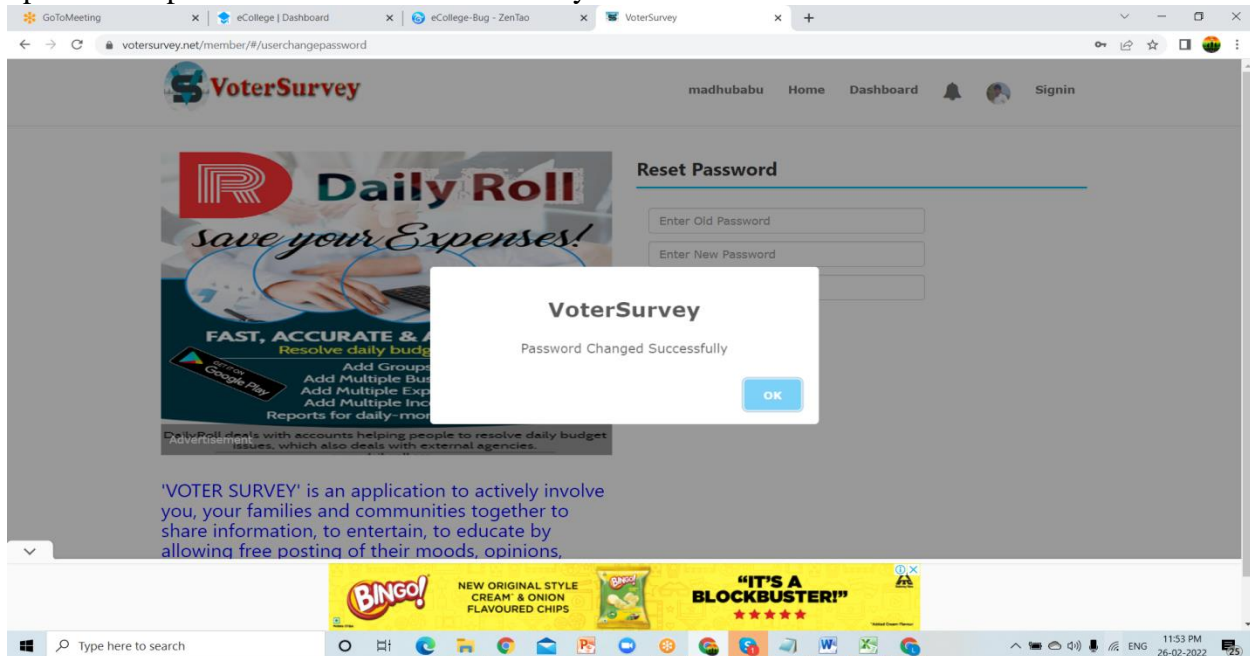

In the application, the process of resetting and updating your profile password is straightforward. Here's how it typically works:

1. Start by navigating to the "Password Settings" or a similar section in your profile settings.

2. To reset your password, you will need to provide the following information:
 - Enter your old (current) password as a security measure to confirm your identity.
 - Input your desired new password, which should meet the application's password criteria (e.g., length, complexity).
3. To ensure accuracy, you will be asked to re-type your new password.
4. Finally, click on the "Reset Password" or "Save Changes" button to complete the process.

This process helps users maintain the security of their accounts by requiring verification of their current password before allowing them to set a new one. It also ensures that users can easily update their passwords as needed for security reasons.

2.2.3. Createpost: -

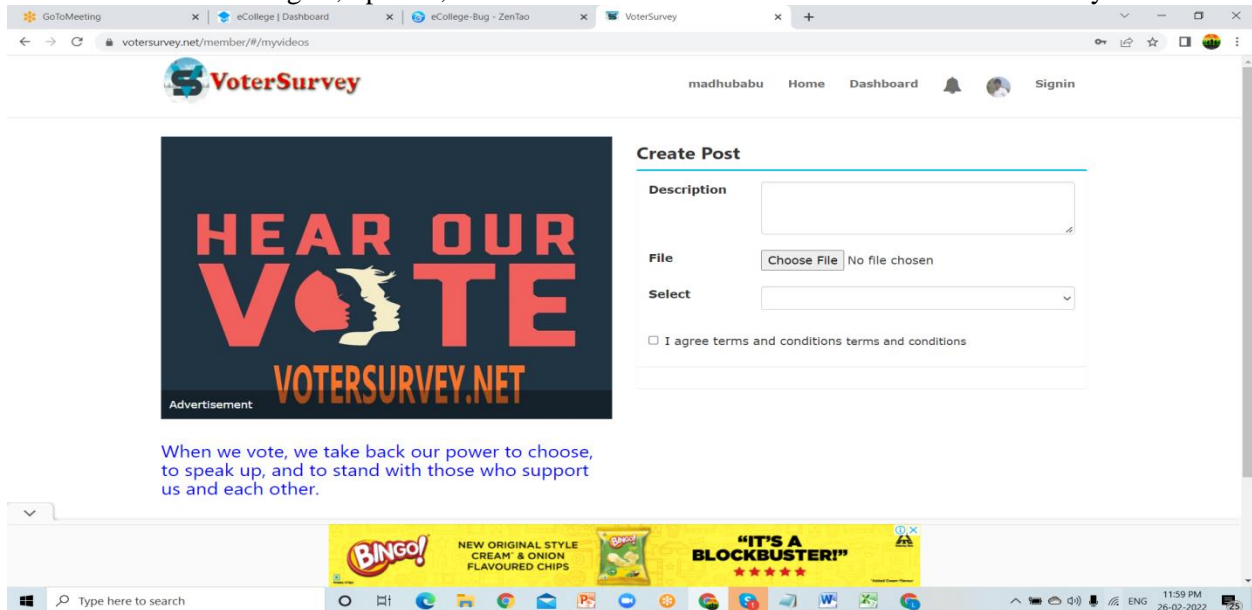

Certainly, creating a post in the application typically involves the following steps:

1. **Click on "Create Post":** Begin by clicking on the "Create Post" option, which is often located within your profile or on a dedicated posting page.
2. **Compose Your Post:** After clicking "Create Post," a window or interface will appear, allowing you to compose your post. In this window, you can typically do the following:
 - Write the text of your post, which may include your thoughts, messages, or any content you wish to share.
 - Add images, videos, or other multimedia elements to your post, if supported by the application.
 - Format your post, such as adding headings, links, or formatting options like bold or italics, depending on the application's capabilities.
3. **Add Details:** Depending on the application, you may have the option to add additional details to your post, such as tags, categories, or privacy settings.

4. **Preview:** Some applications offer a preview option so you can see how your post will appear to others before publishing.

5. **Publish:** Once you're satisfied with your post, you can click the "Publish" or "Share" button to make it visible to other users, or you might have additional options like scheduling the post for a future date and time.

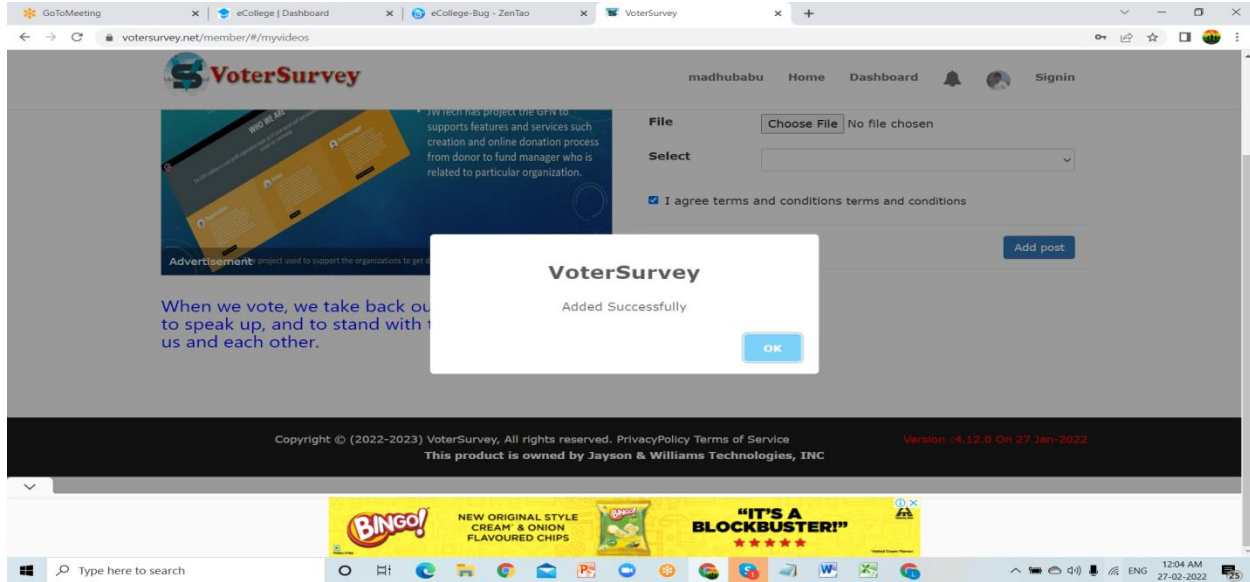

Creating and sharing posts is a fundamental feature of many social media and online platforms, allowing users to share their thoughts, updates, and content with their network or the wider community.

To add a post in the application:

1. Write a description for your post.
2. Choose and upload files like images or videos.
3. Select whether the post is public or private.
4. Agree to the terms and conditions.

5. Click "Add Post" to publish it. This process allows you to share or store your content as desired.

Certainly, here's a summary of the process for adding a post in the application:

1. Click on the profile dropdown, where you'll find the "Create Post" option.
2. After selecting "Create Post," you can immediately input a description, attach files, and choose to share the post with specific groups or make it public.
3. Fill in the required data and select "Agree Third Condition."
4. Click "Add" to post your content.

By following these steps, you can add a post to the application and choose whether to share it with specific groups you've created or with the public, as per your preferences and the application's features.

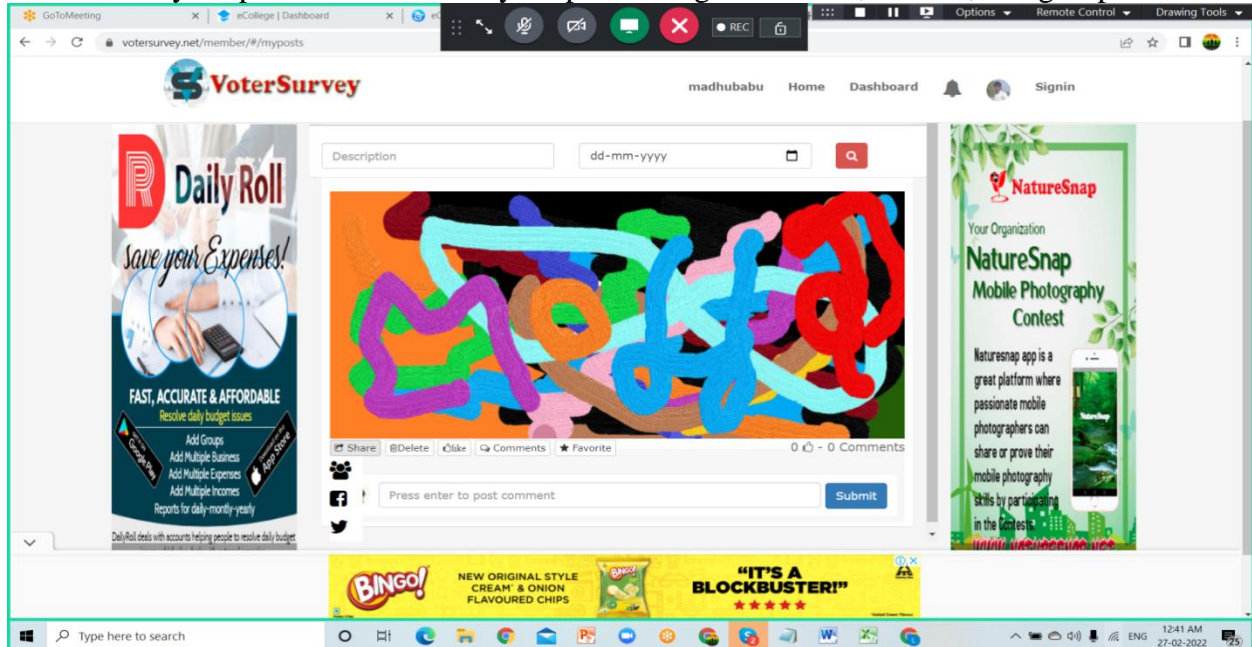

To delete a post in the application:

1. Locate the post you want to delete.
2. Look for the "delete" option, usually found at the bottom of your post.
3. Click on the "delete" option to remove the post from the platform.

Deleting a post is a straightforward process and helps you manage your content within the application.

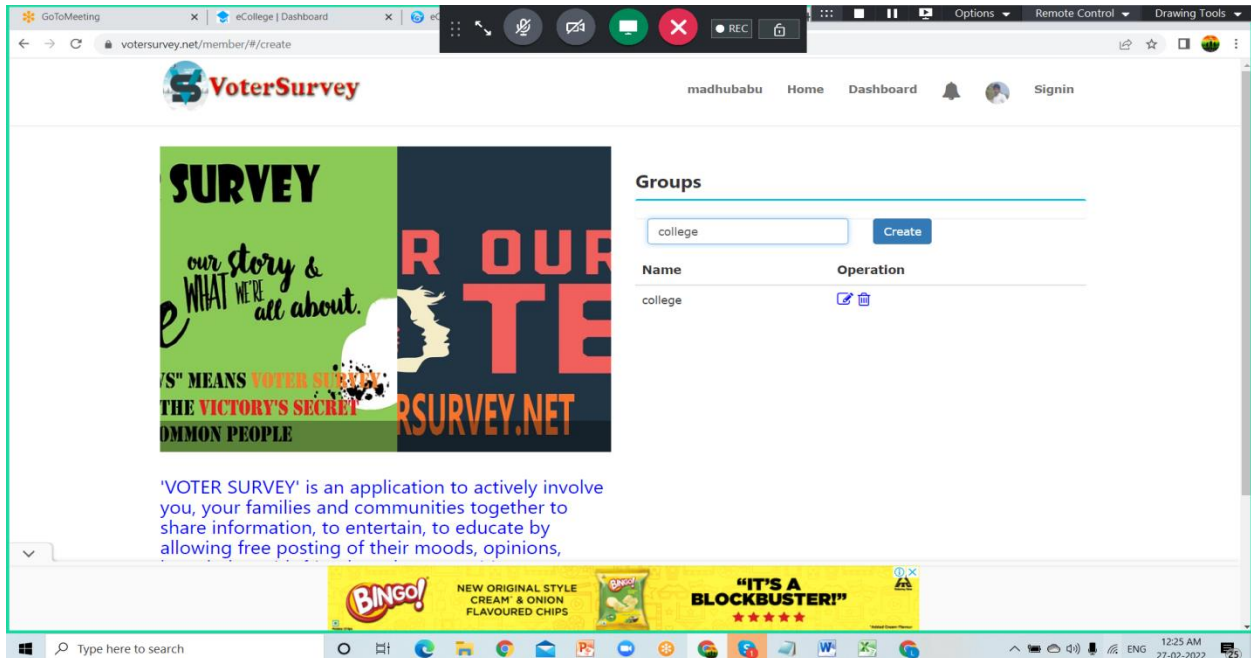

We can easily share each post by clicking on the share option, which was present on the downside of your post. You can share your post through Facebook, Twitter, and groups.

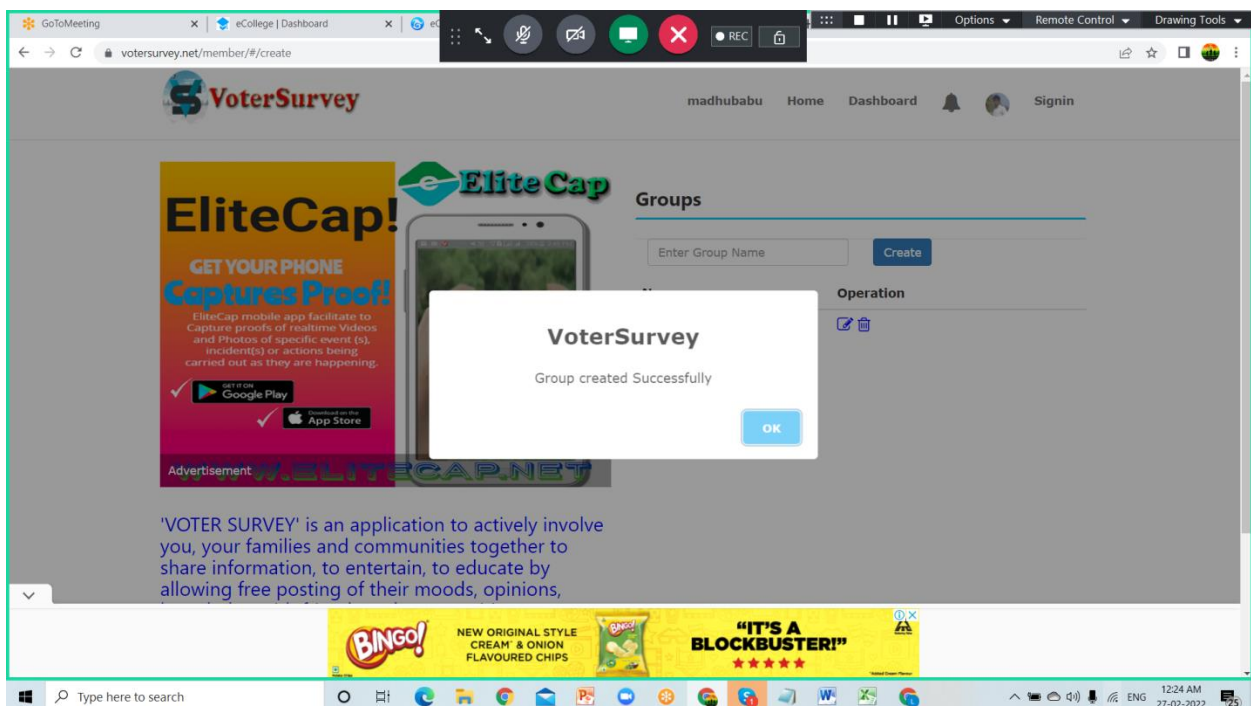

2.2.4. CreateGroup: -

Creating groups in the application allows you to organize and connect with friends and family. When you create a post and select a specific group from the dropdown menu while posting, the post becomes visible exclusively to the members of that group. This feature enables you to share content selectively with a particular set of people, enhancing privacy and facilitating focused communication within your social circles.

When we create a group, it will show the successful pop-up page as shown below.

2.2.5. Myposts: -

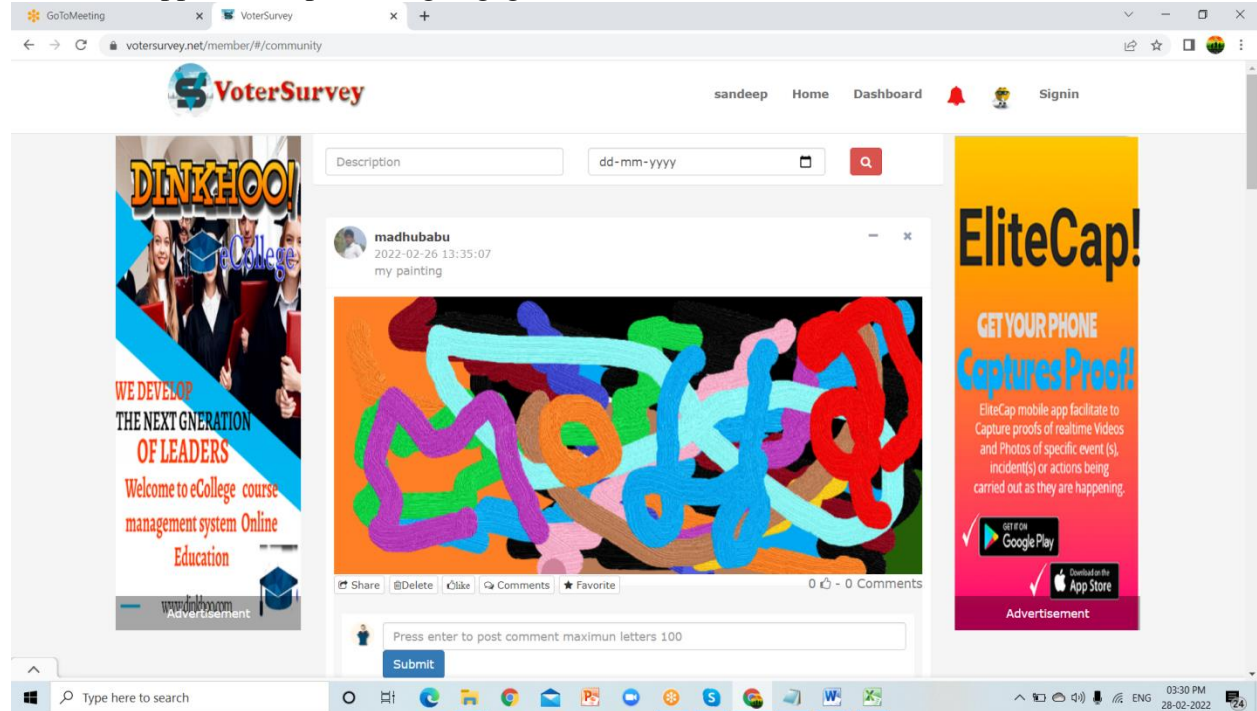

To access all your posts in the application, simply click on your profile icon or name button, which will take you to your profile page. There, you can view a comprehensive list of all the posts you've created or shared, providing an overview of your post history.

The screenshot displays the VoterSurvey application interface. At the top, the user is logged in as 'madhubabu' and is viewing their profile page. The page features a navigation menu with 'Home' and 'Dashboard' options, and a 'Signin' button. A sidebar on the right contains a 'Profile' section with a 'Create Post' button and a 'madhubabu' profile card, along with options for 'Groups', 'Reset Password', and 'Logout'. The main content area shows a post titled 'my painting' by 'madhubabu' from 2022-02-26 13:35:07. The post content is a colorful abstract painting. Below the post, there are options to 'Share', 'Delete', 'Like', 'Comments', and 'Favorite'. A comment input field is visible with a 'Submit' button. The page also includes several advertisements, such as 'Krimewatch', 'BINGO!', 'EliteCap!', and 'DINKHOO!'. The browser's address bar shows the URL 'votersurvey.net/member/#/create'.

Notifications: -

In the application, the bell icon represents notifications. Clicking on "Shared Post" within notifications reveals various types of notifications, including event shares and group invitations. Notifications also include a "Delete Request" option, which allows users to request the removal

of events they dislike. This system keeps users informed about their interactions and activities within the application, promoting engagement and control over shared content.

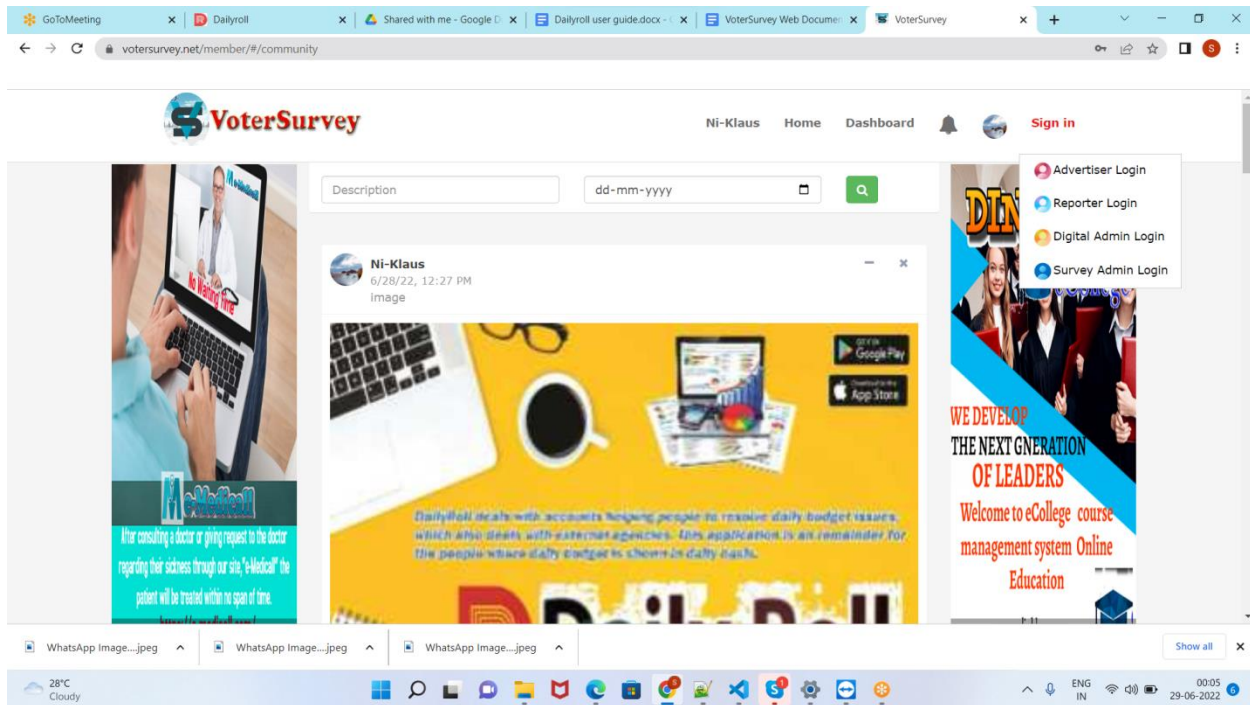

3. Sign in: -

When you open the application, the home page offers a sign-in option with four distinct types:

1. **Advertise Login:** This is a login option likely intended for individuals or entities involved in advertising-related activities within the application.
2. **Reporter Login:** This login option may be designed for users who have the role of reporters or contributors, possibly for news or content creation.
3. **Digital Admin Login:** This login is likely for digital administrators who manage and oversee various aspects of the application's digital operations and content.
4. **Survey Admin Login:** This login type appears to be intended for administrators responsible for survey-related activities and management within the application.

Each of these login options likely grants access to specific features and functionalities tailored to the roles and responsibilities associated with those user categories within the application.

3.1. Advertiserlogin: -

Advertiser:

To register as an advertiser in the application:

1. Click "Register" in the advertiser login section.
2. Provide your name, email, phone number, and password.
3. Save the data.
4. Ensure the registration process is completed without interruption.
5. Your account awaits approval from the support team.
6. Upon approval, an activation link is sent to your registered email.
7. Activate your account by clicking the link.
8. A successfully activated account allows you to log in; without activation, the support team won't approve it.

Advertiser Login:

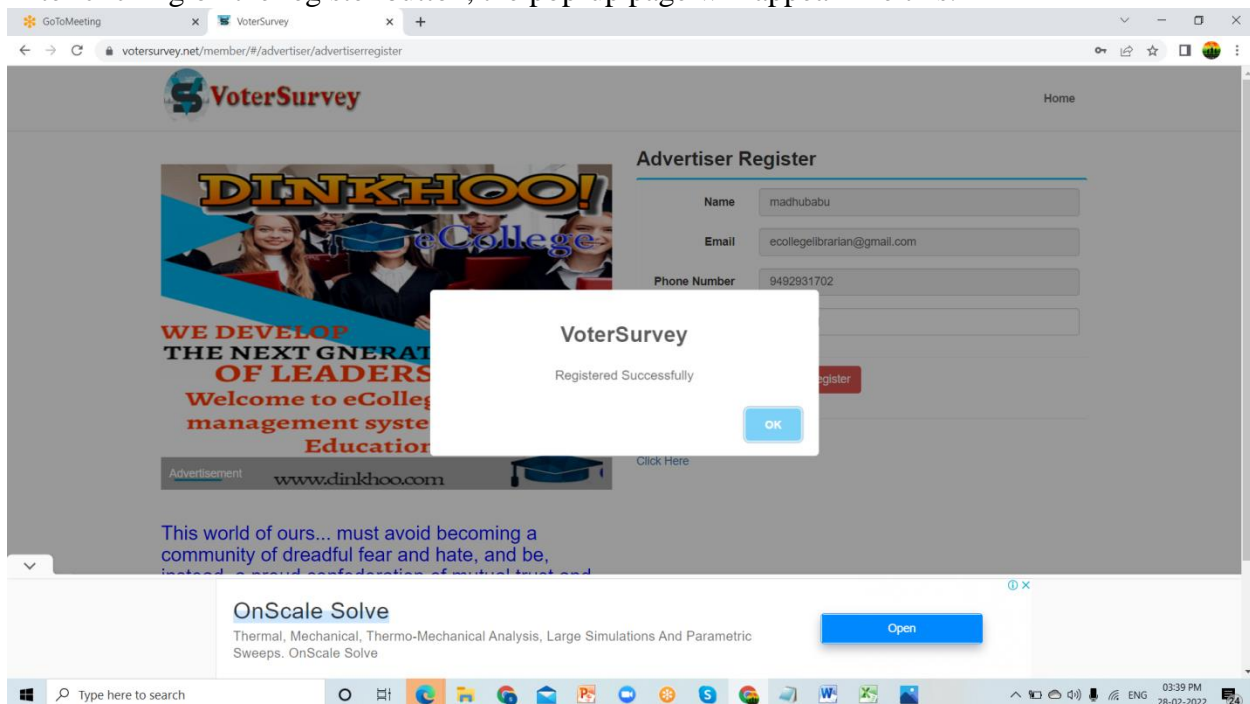

In the Advertiser Login of the application:

1. If you're already registered, you can log in using your email and password.

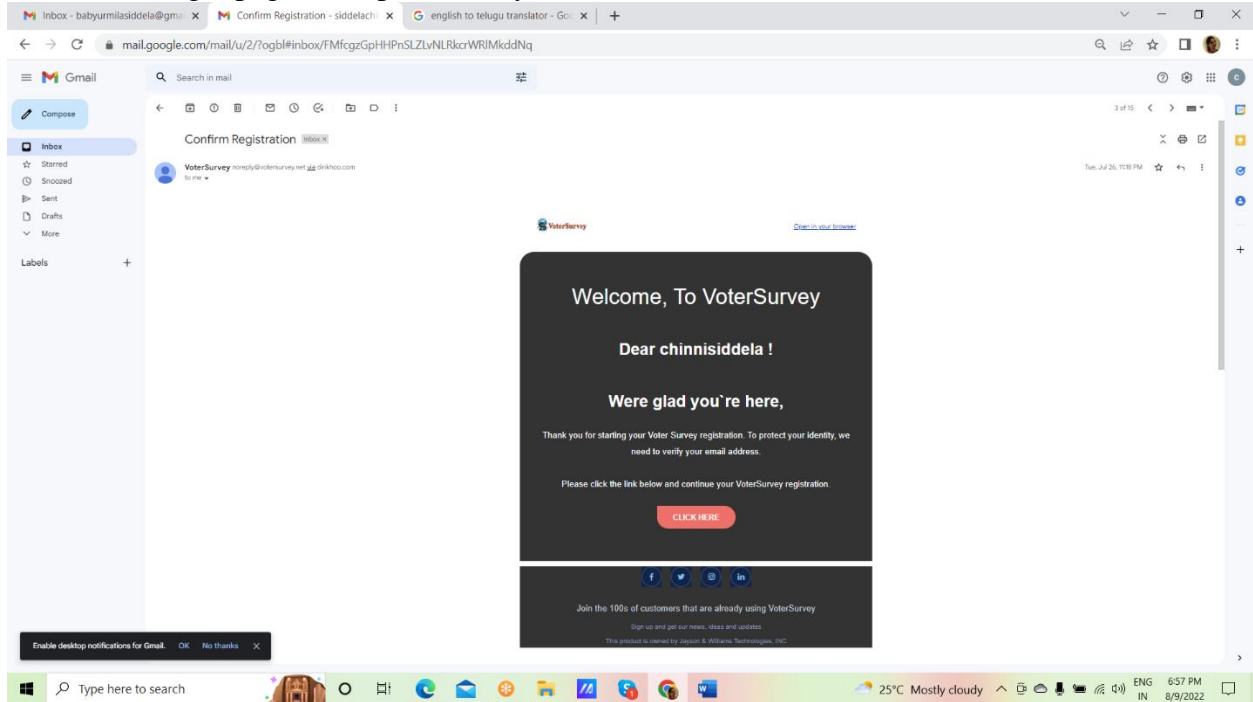

2. If you attempt to log in with an incorrect email and password, you won't access the Community Page, and you'll need to retry with the correct credentials.

3. Indeed, the Advertiser Register page offers a straightforward registration process for new users. To register, individuals simply need to provide all the required details, such as their name, email address, phone number, and password. Once all the necessary information is entered, they can click on the "register" button. This process allows new users to complete their registration and gain access to the various features and functionalities provided by the application.

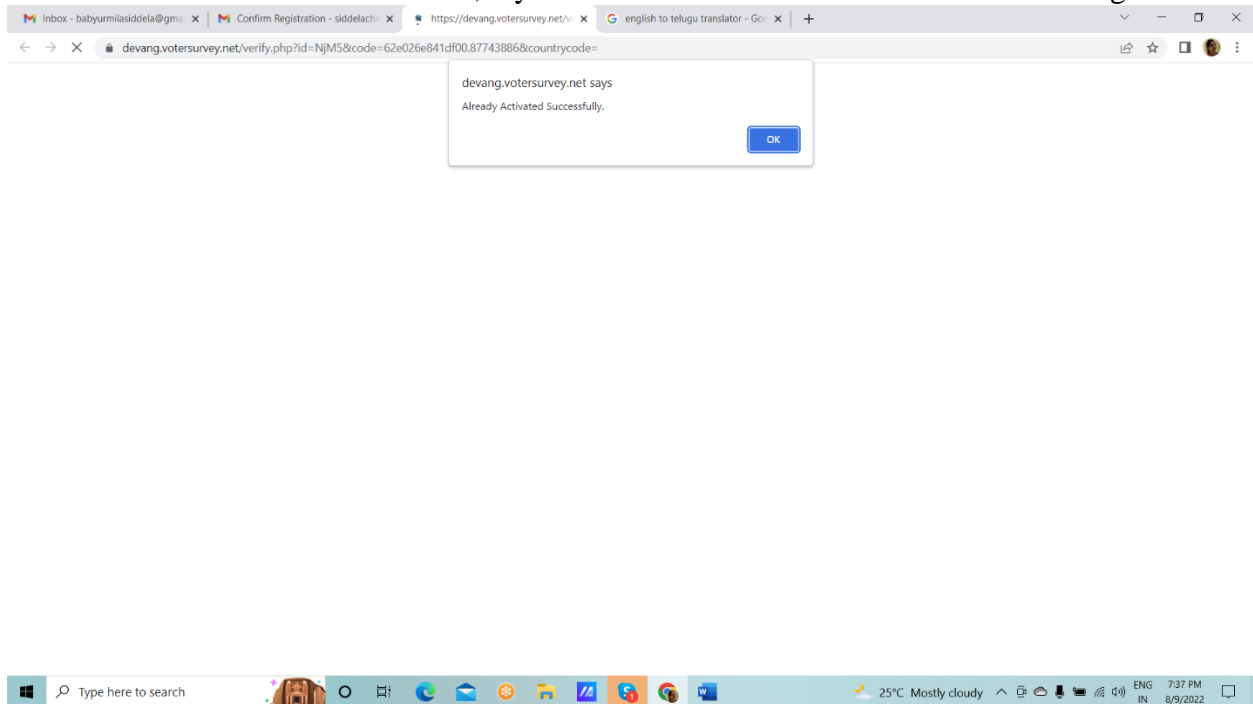

After clicking on the register button, the pop-up page will appear like this.

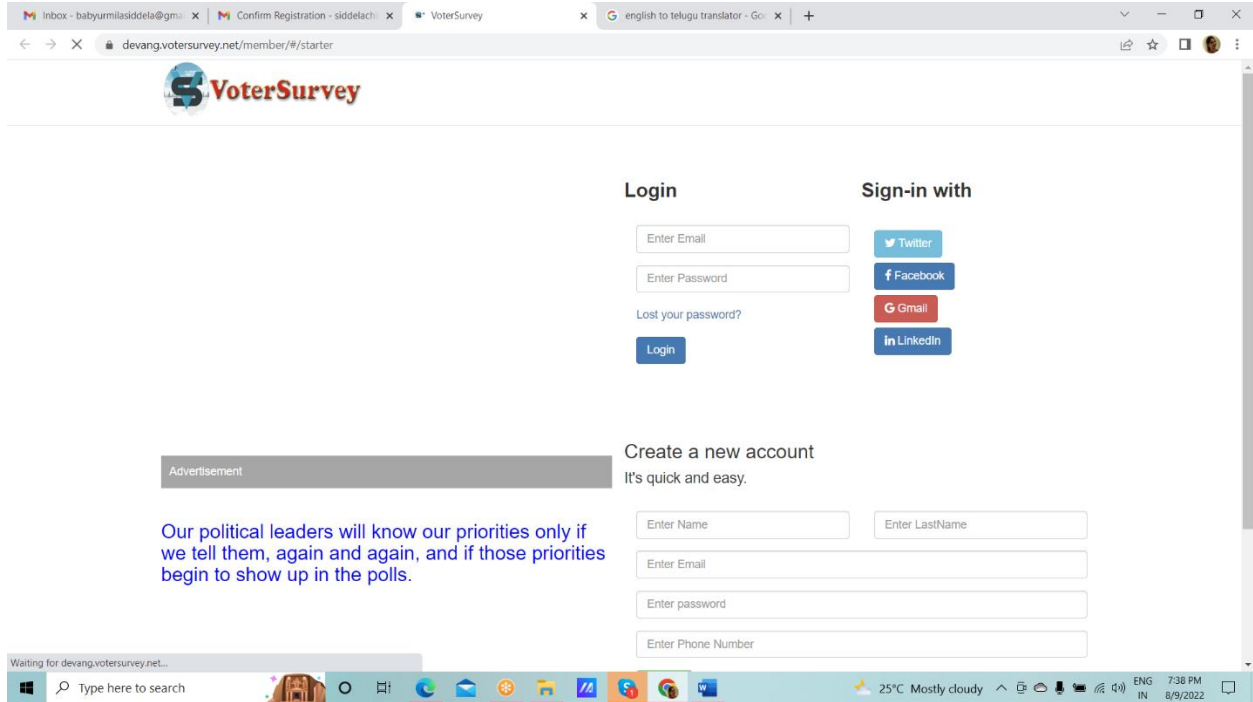

The user gets an email to activate his advertiser login as shown below. Then click on the OK button. The login page will open directly as shown below.

After I click on the activation button, my account is activated as shown in the below figure.

Then click on the OK button The login page is opened directly as shown in the below figure.

3.1.1. Advertiser login1:

After successful registration, users must activate their account by email before logging in.

The Advertiser login page will appear like this.

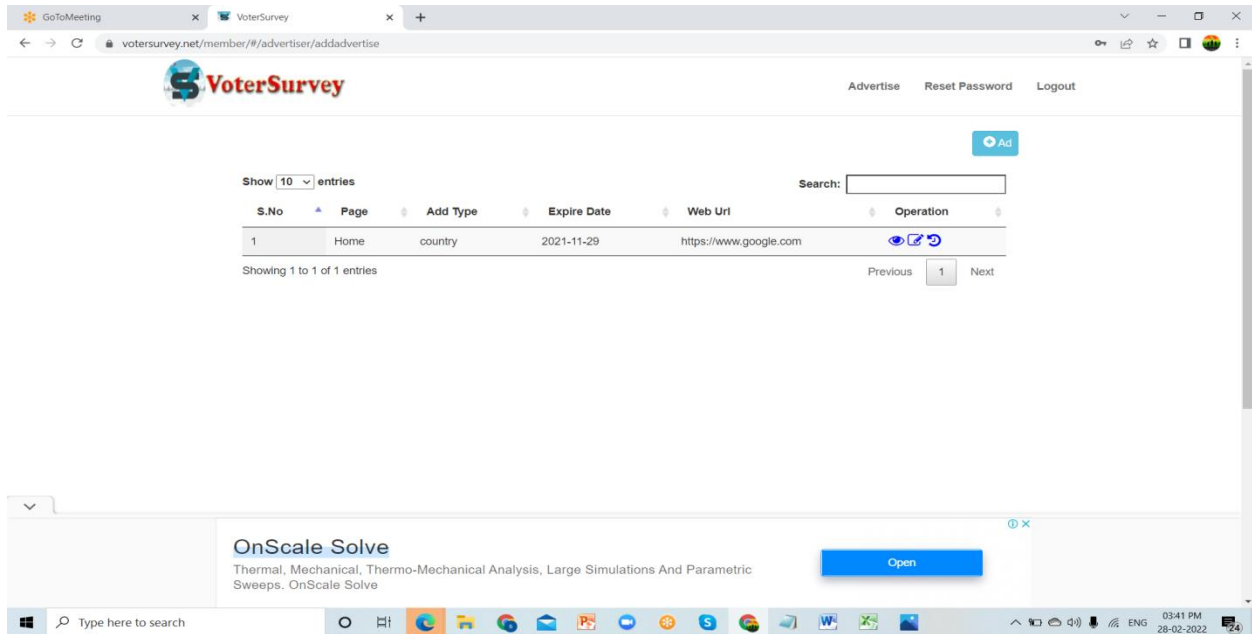

The screenshot shows a web browser window with the URL votersurvey.net/member/#/advertiser. The page header includes the VoterSurvey logo and a 'Home' link. The main content area is divided into two sections. On the left is a banner for 'eCollege System' featuring an image of a laptop displaying 'EDUCATION' and the text 'eCollege System supports features and services in classrooms, courses, batches.' Below the banner is a quote: 'his world of ours... must avoid becoming a community of dreadful fear and hate, and be, instead, a proud confederation of mutual trust and respect.' On the right is the 'Advertiser Login' section, which contains an 'Email' field with the value 'tt5007440@gmail.com', a 'Password' field with masked characters, a 'Login' button, and links for 'Forgot password?' and 'Create an account'.

In the advertiser's login section of the application, after successfully logging in, you will have access to the "Ad" button, which allows you to create and manage advertisements. Here's a summary of the process for creating an advertisement:

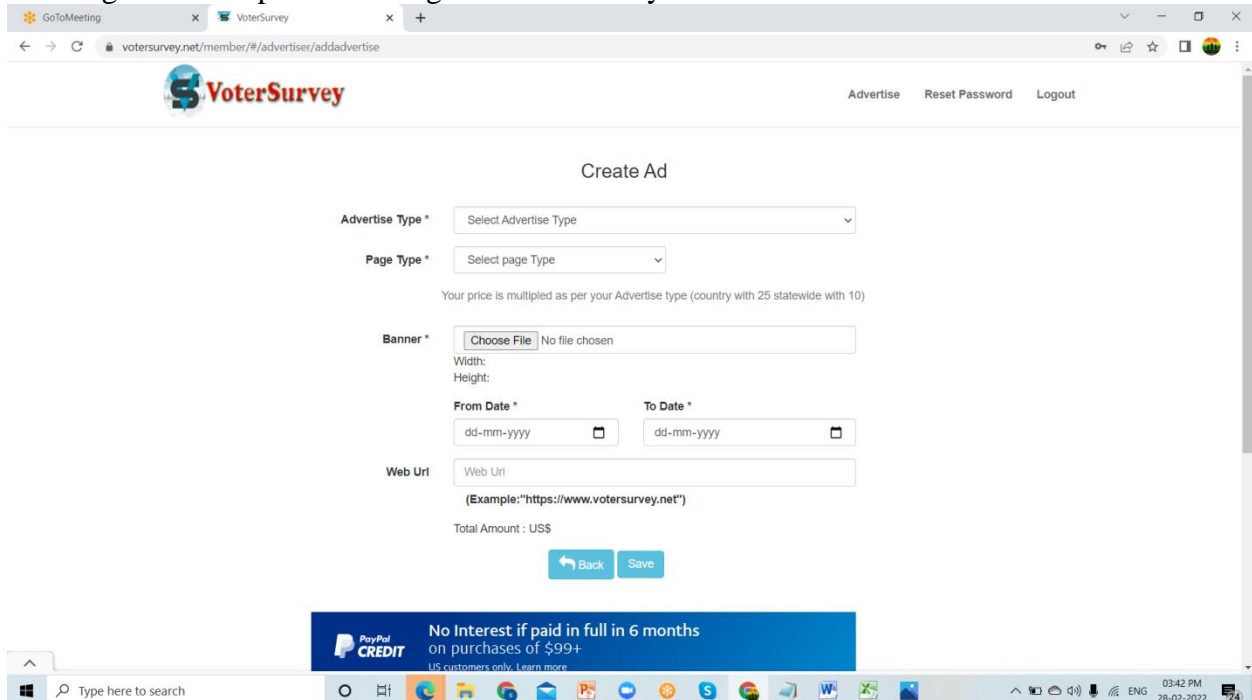

1. **Click on the "+Ad" Button:** To create a new advertisement, click on the "+Ad" button.
2. **Advertisement Type:** You can select between nationwide and statewide options for the ad. The banner's visibility will depend on the geographical area you choose.
3. **Page Type:** Choose the type of page where you want the banner to appear. Options typically include Home Type, Survey Type, Mobile Type, and others. The size and design of the banner can vary based on the selected page type.
4. **Banner Images:** Upload the banner images you want to use for your advertisement.
5. **Date Range:** Specify the start and end dates for when you want the banner to be displayed in the application.
6. **Web URL:** Optionally, you can provide a web URL where users can be directed when they click on the banner. This could link to a company website or a specific message you want to convey.
7. **Save:** After entering all the necessary details, save the advertisement. This action will take you to the payment page.

8. ****Payment:**** On the payment page, you can proceed with the payment, typically using a PayPal account, and set the duration for how many days the banner should be displayed.

By following these steps, users can create and manage advertisements within the application, choosing their target audience, banner type, page placement, and duration.

On this page, users have the ability to create the desired type of advertisement by completing all the provided fields. Before adding the advertisement type, the page typically appears as follows, allowing users to input and configure the necessary details for their advertisement.

Once users have selected the advertisement type, the creation page for the advertisement will typically be presented in the format shown below. This page allows users to specify the details and parameters specific to the chosen advertisement type, including the banner's appearance, duration, web URL, and any other relevant information.

The PayPal login page is where users can securely make payments for the advertisement. At this stage, users will typically be prompted to log in to their PayPal accounts or provide the necessary payment information to complete the transaction securely.

3.1.2 Reset Password: -

Advertisers typically have the option to change their password easily by clicking on the "Reset Password" option, which is usually located at the top of the screen or within the account settings. This feature allows users to update their passwords for security purposes or as needed, enhancing

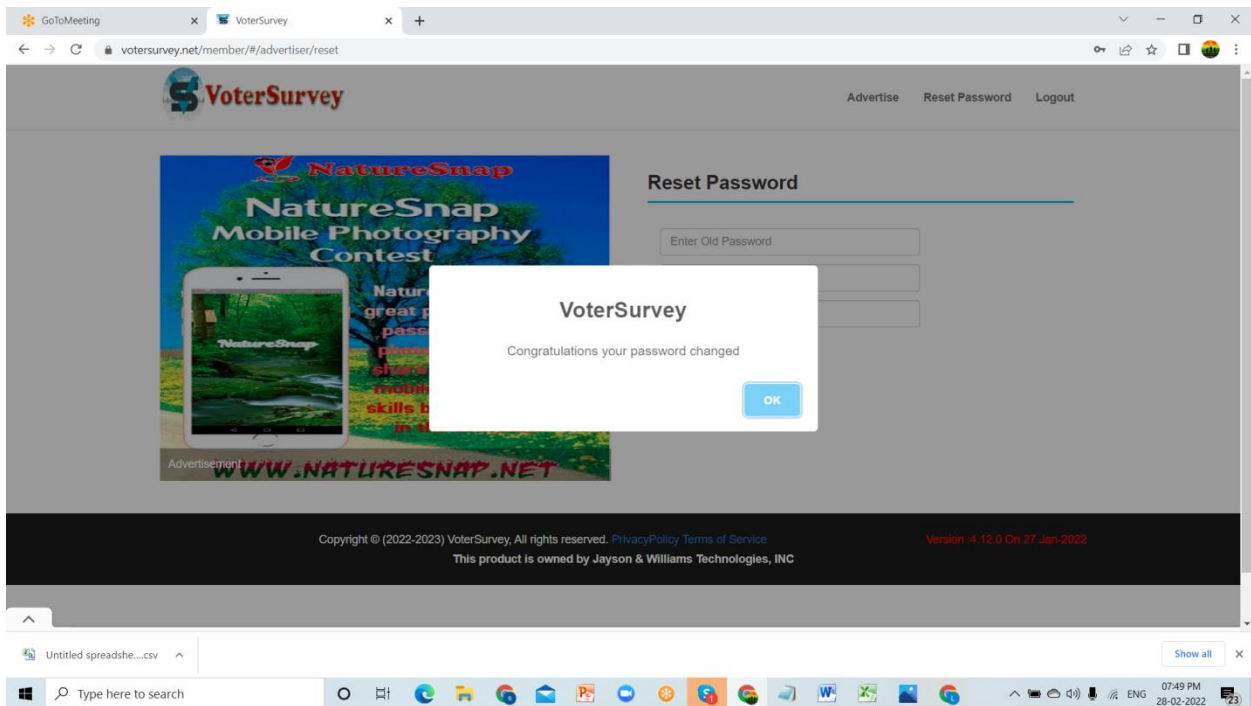

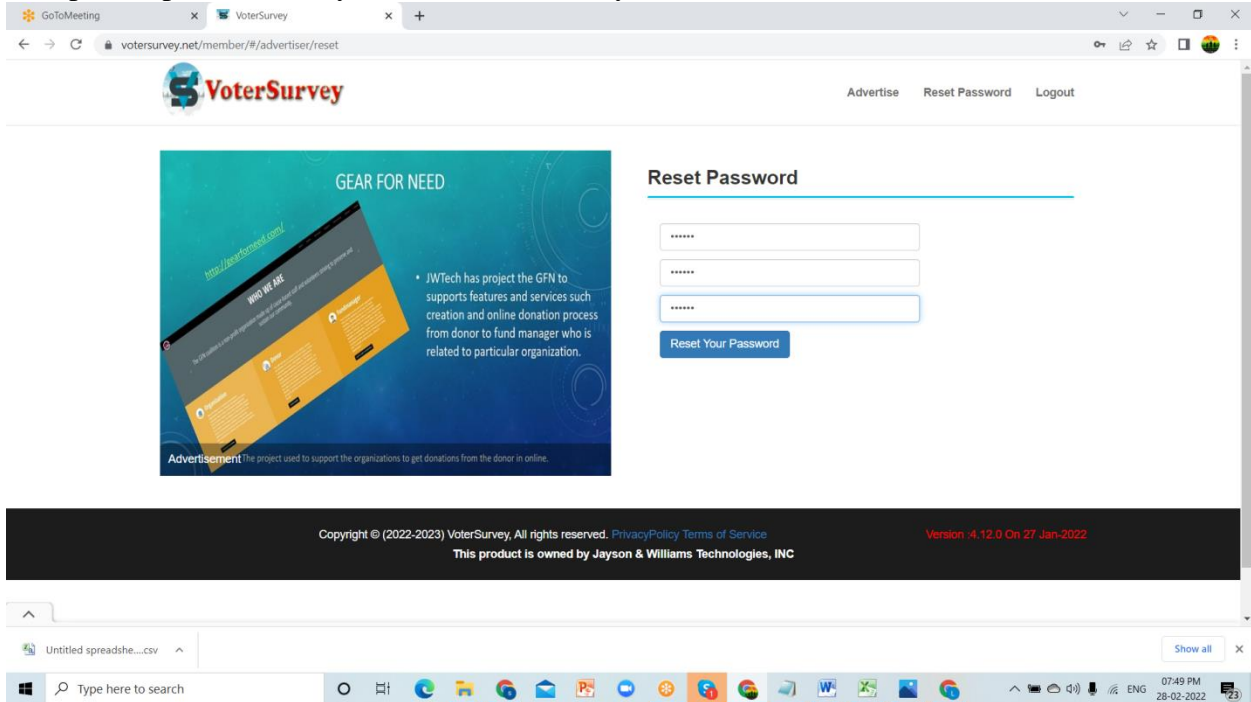

the protection of their accounts.

The screenshot shows a web browser window with two tabs: 'GoToMeeting' and 'VoterSurvey'. The active tab is 'VoterSurvey' with the URL 'votersurvey.net/member/#/advertiser/addadvertise'. The page header features the 'VoterSurvey' logo and navigation links for 'Advertise', 'Reset Password', and 'Logout'. Below the header, there is a table with columns: 'S.No', 'Page', 'Add Type', 'Expire Date', 'Web Url', and 'Operation'. The table is currently empty, displaying 'No data available in table'. A search bar is located above the table. The browser's taskbar at the bottom shows various application icons and the system clock indicating 07:43 PM on 28-02-2022.

When you click on the "Reset Password" option, a window typically opens for password reset. The process usually involves the following steps:

1. Enter Old Password: Provide your current or old password as a security measure to verify your identity.
2. Enter New Password: Input the new password you want to set for your account.
3. Retype New Password: To ensure accuracy, retype the new password.
4. Click "Reset Your Password": Once you've filled in the required fields, click the "Reset Your Password" or similar button to confirm your new password.

Following these steps, your password will be successfully reset, and you'll be able to log in with the updated password for your account's security.

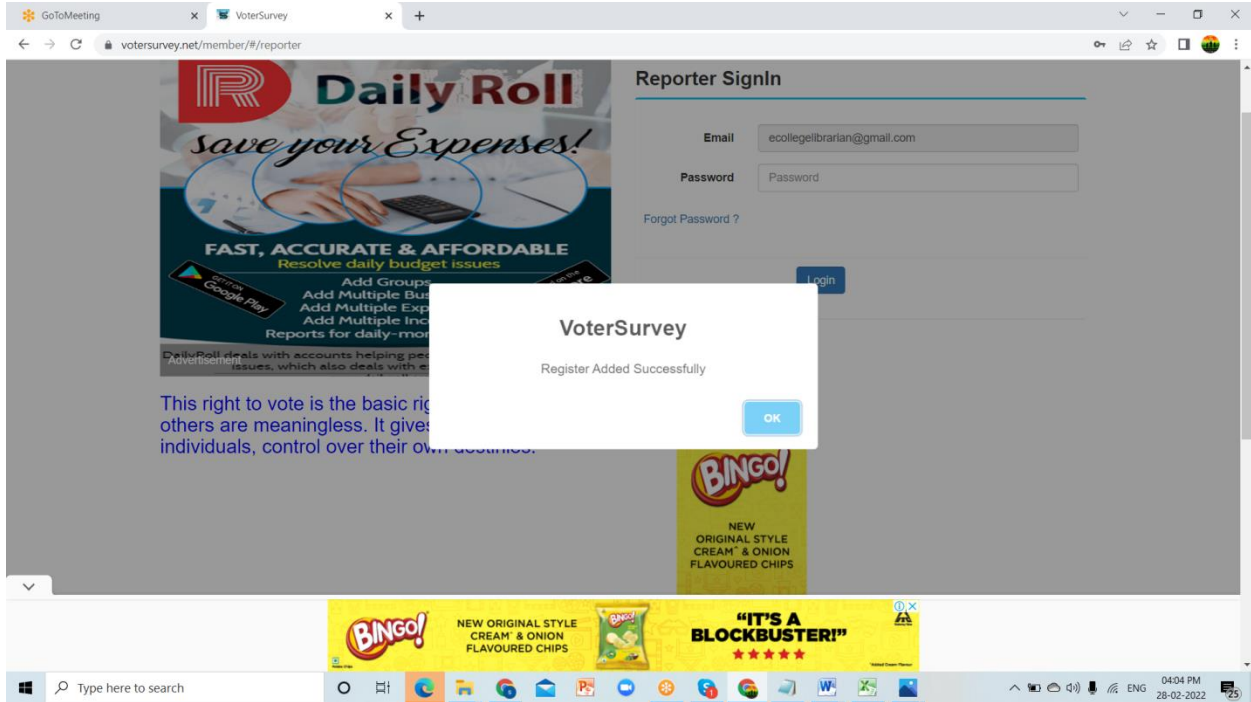

3.2 Reporter register: -

In the Reporter Login section of the application, here is a summary of the registration and activation process:

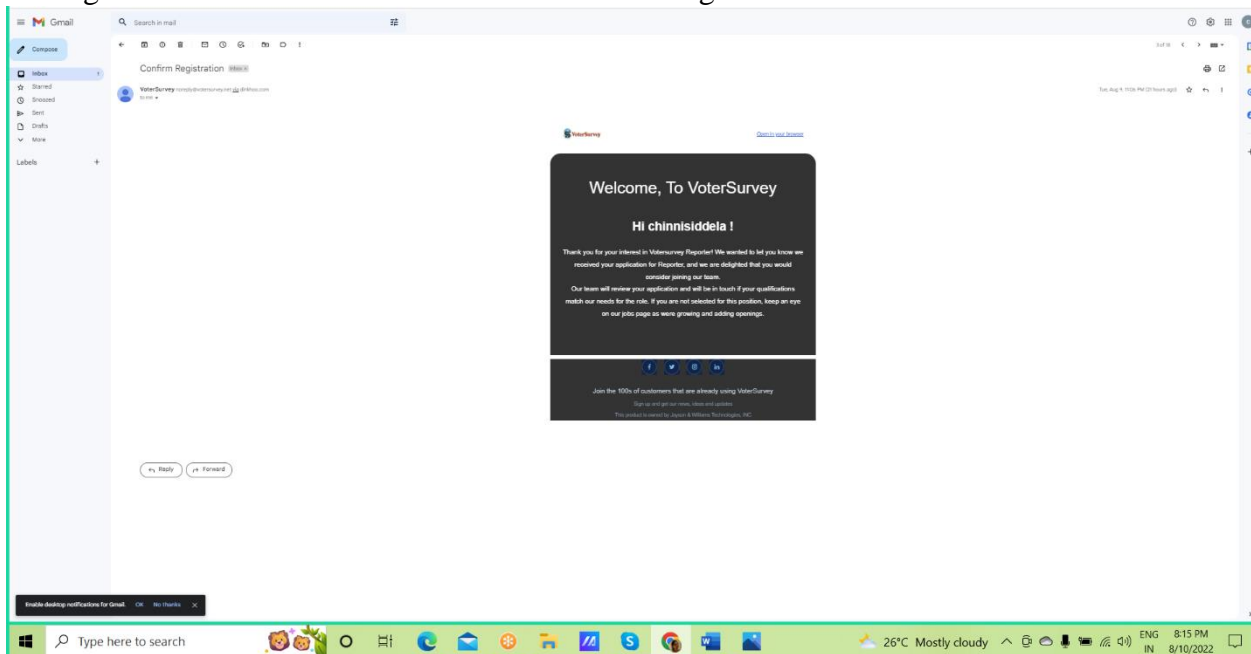

1. **Click on "Register":** To use Reporter Login, click on the "Register" option.
2. **Provide Details:** Enter your name, email address, phone number, and password during the registration process.
3. **Registration Confirmation:** If the registration is successful, you will receive a confirmation. In case of any issues, you may need to re-enter your registration data.
4. **Approval Required:** After successful registration, your account awaits approval from the support team.
5. **Activation Link:** Once your account is approved, you will receive an activation link in your registered email. Clicking on this link is crucial for activating your account. An inactive account won't be accessible.
6. **Support Team Confirmation:** Your Reporter Login is typically confirmed and accepted by the support team. You will receive a message in your email with activation instructions.

By following these steps and activating your account through the provided link, you can successfully register and access your Reporter Login account within the application.

The screenshot shows a web browser window with the URL `votersurvey.net/member/#/reporter/register`. The page is titled "Reporter Register" and contains a registration form with the following fields: First Name (filled with "madhubabu"), Email (filled with "ecollegelibrarian@gmail.com"), Phone (filled with "9492931702"), Password (masked with "*****"), and Resume (with a "Choose File" button and "new resume-1.pdf" listed). A blue "Register" button is located below the form. To the left of the form is an advertisement for "Krimewatch" featuring a hand holding handcuffs and the text: "Every Cell can be a CC Camera. Beware, Krimewatch every where, in order for a society to be a safe place to live in, all society members including the governments and people must take necessary measurements to keep it a crime-free place". Below the advertisement is a blue link: "This world of ours... must avoid becoming a community of dreadful fear and hate, and be, instead, a proud confederation of mutual trust and respect." The footer of the page contains copyright information: "Copyright © (2022-2023) VoterSurvey, All rights reserved. PrivacyPolicy Terms of Service" and "Version :4.12.0 On 27 Jan-2022". A note states "This product is owned by Jayson & Williams Technologies, INC". At the bottom of the browser window, there is a Bing advertisement for "BINGO! NEW ORIGINAL STYLE CREAM & ONION FLAVOURED CHIPS" with the text "IT'S A BLOCKBUSTER!" and five stars.

Upon receiving a message from the support team, the content of the message is typically displayed as shown in the figure or interface provided. This message often contains important information or instructions related to your account activation or access to specific features within the application. Users should carefully review and follow any instructions provided in such messages to ensure smooth account activation and usage.

After your application's support team approves your registration, you will be able to log in and access the application using your approved account credentials. The approval process is typically necessary to ensure that users meet the application's requirements and guidelines before gaining access to its features and services.

3.2.1 Reporter Login: -

When a reporter logs in successfully, they will typically need to enter their email ID and password as part of the login process. Entering the correct email ID and password combination is essential for a successful login, granting the user access to their reporter account within the application. This login verification helps ensure the security and privacy of the user's account.

Below the table, it indicates 'Showing 1 to 5 of 5 entries' and provides 'Previous' and 'Next' navigation options. A BINGO! advertisement is displayed on the left and bottom of the page.

3.2.2 Publish Video: -

In the application, users can publish videos using the "Add Publish Video" option. When adding a video, they provide details like address, city, state, country, description, and the video file or YouTube URL. After clicking "Publish," the video becomes public. Subsequently, users can further manage video details, such as tags and categories, in the "Add Video Data Details" page. This process facilitates video publication and comprehensive management within the application.

3.2.2.1 Edit and Delete: -

Reporters typically have the ability to edit or delete event videos easily by accessing the options provided on the event table within the application. These options allow reporters to manage and make changes to their event videos, ensuring that their content remains up-to-date and relevant as needed.

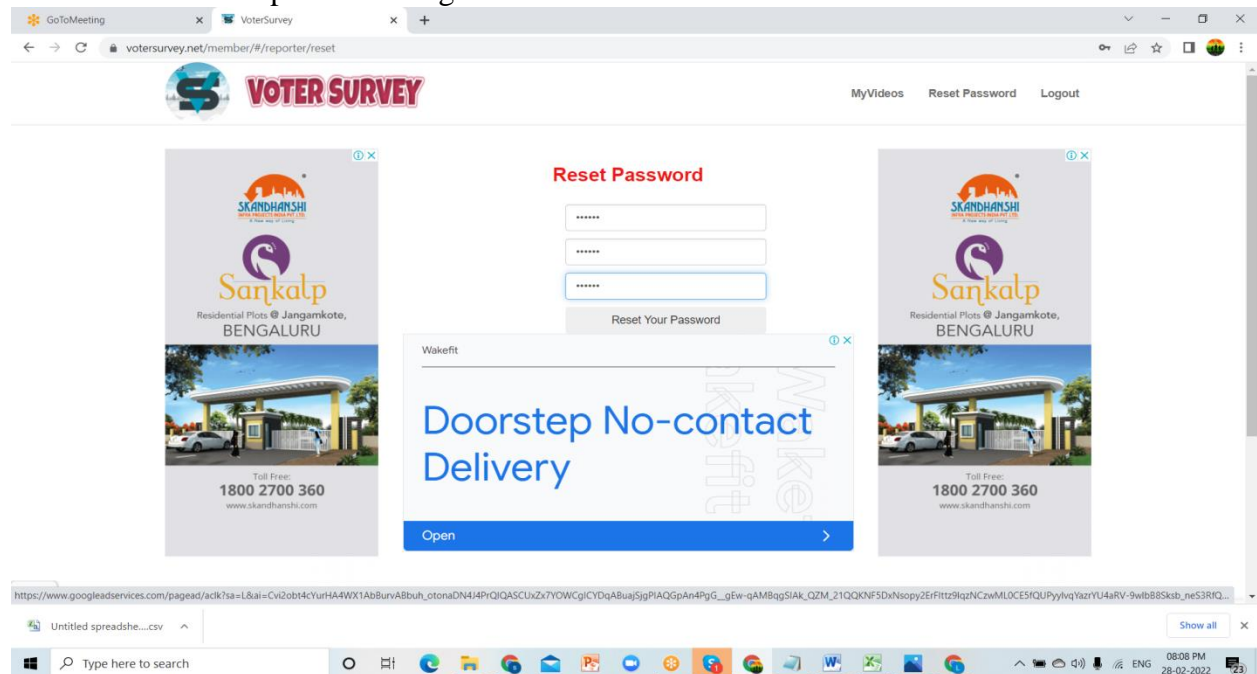

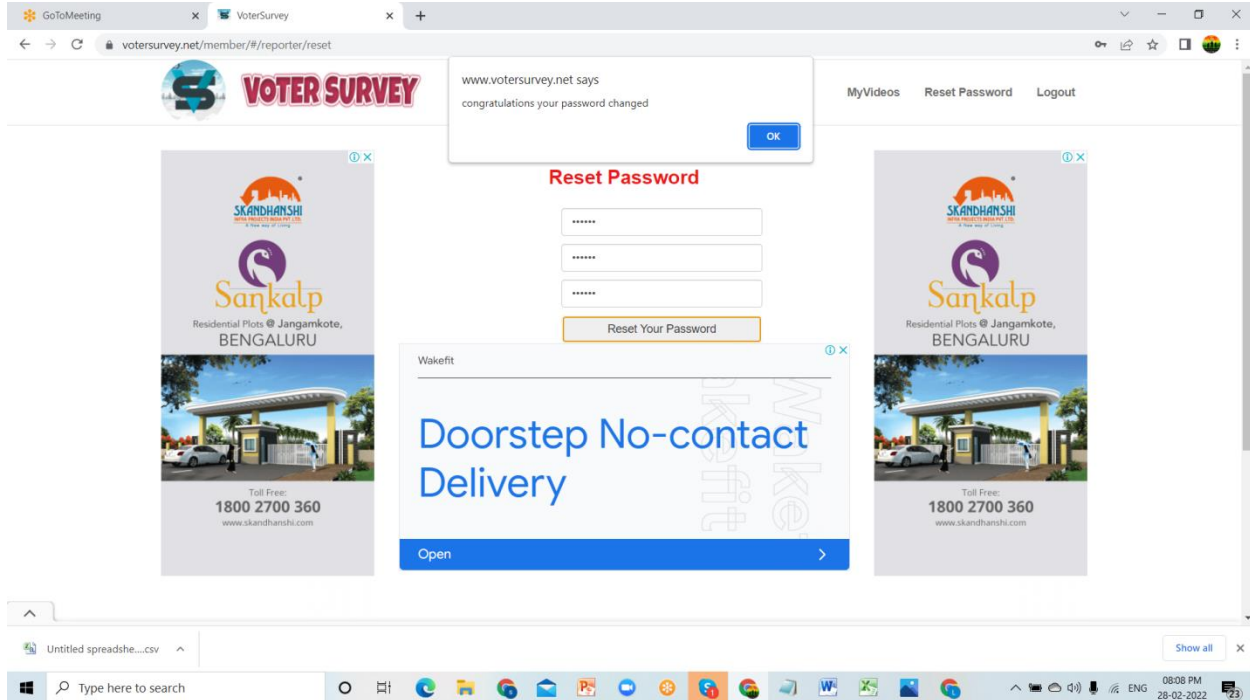

3.2.3. ResetPassword: -

In the reporter's login of the application, there is typically an option called "Reset Password" that allows reporters to change their password. Here's how this process generally works:

1. **Click on "Reset Password":** Reporters can initiate the password reset process by clicking on the "Reset Password" option.
2. **Enter Old Password:** As a security measure, they will be asked to provide their old or current password.
3. **Enter New Password:** Reporters can then input the new password they wish to use.
4. **Retype New Password:** To ensure accuracy, they will be required to retype the new password.
5. **Click "Reset Your Password":** After completing the necessary fields, they can click the "Reset Your Password" button.

By following these steps, reporters can successfully reset their password to enhance the security of their account or update their login credentials as needed.

3.3 Digital admin login: -

In the Survey Voting Login section of the application, here is a summary of the registration and activation process:

1. **Click on "Register":** To use Survey Voting Login, click on the "Register" option.
2. **Provide Details:** Enter your name, email address, phone number, and password during the registration process.
3. **Registration Confirmation:** If the registration is successful, your account will be created. However, if there is an issue during registration, you may need to re-enter your registration data.
4. **Activation Link:** After successful registration, you will always receive an activation link in your registered email. Clicking on this link is crucial for activating your account. An inactive account won't be accessible.
5. **Support Team Approval:** Typically, after activation, your Survey Voting Login will be accepted by the support team. You may receive a confirmation email with instructions for account activation.

By following these steps and activating your account through the provided link, you can successfully register and access your Survey Voting Login account within the application. Activation is essential for account approval and access.

3.3.1.1 Register login: -

After admin signs in, the page will look like below.

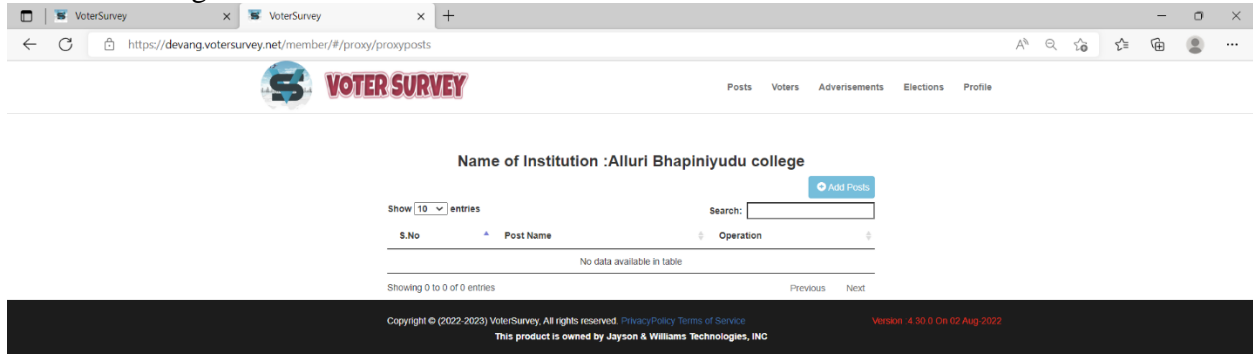

In the admin interface, there are five tabs:

1. **Posts:** Used for managing and moderating content within the application.
2. **Voters:** For handling user accounts and profiles related to voting activities.
3. **Advertisements:** Used to manage and monitor advertisements.
4. **Elections:** For overseeing election-related processes and results.
5. **Profile:** Allows admins to access and modify their own account settings.

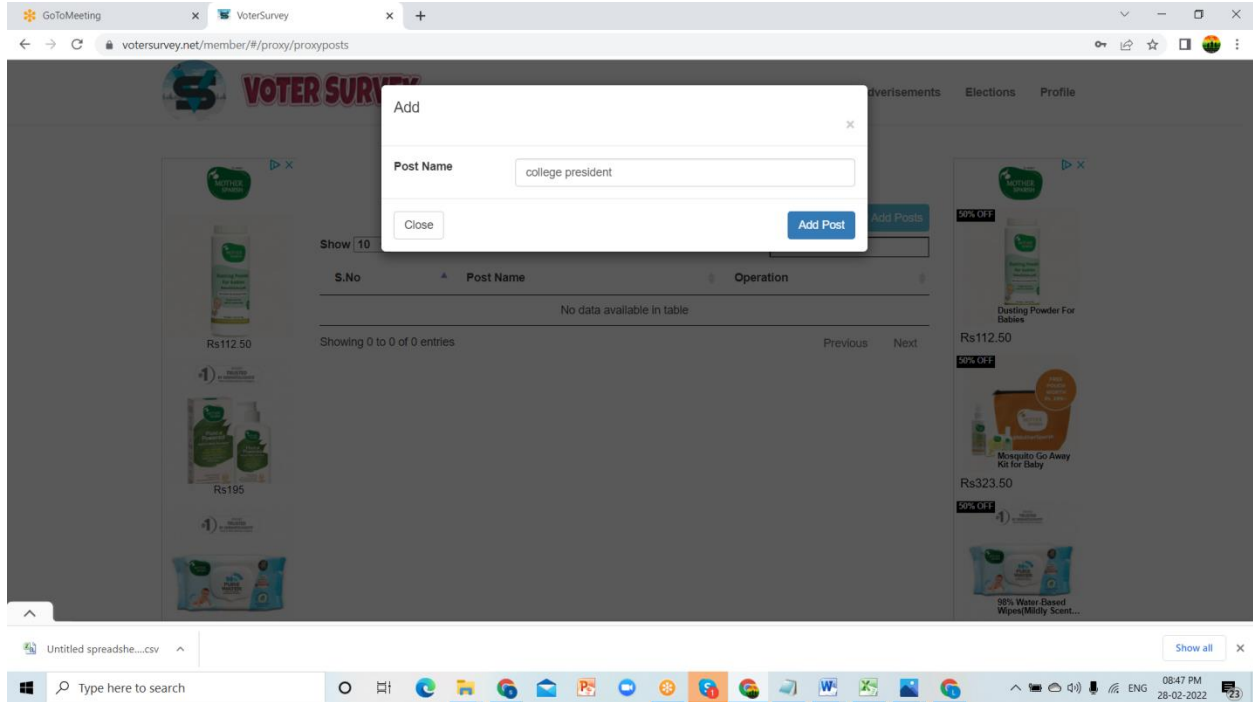

These tabs enable admins to efficiently manage various aspects of the application, ensuring its functionality and integrity.

3.3.1.2. Creating Posts: -

The first tab will have a "post" option. If you click on that post button, the tab is open as shown in the below figure.

After it is open, click on the "add post" button. That is open like in the below figure.

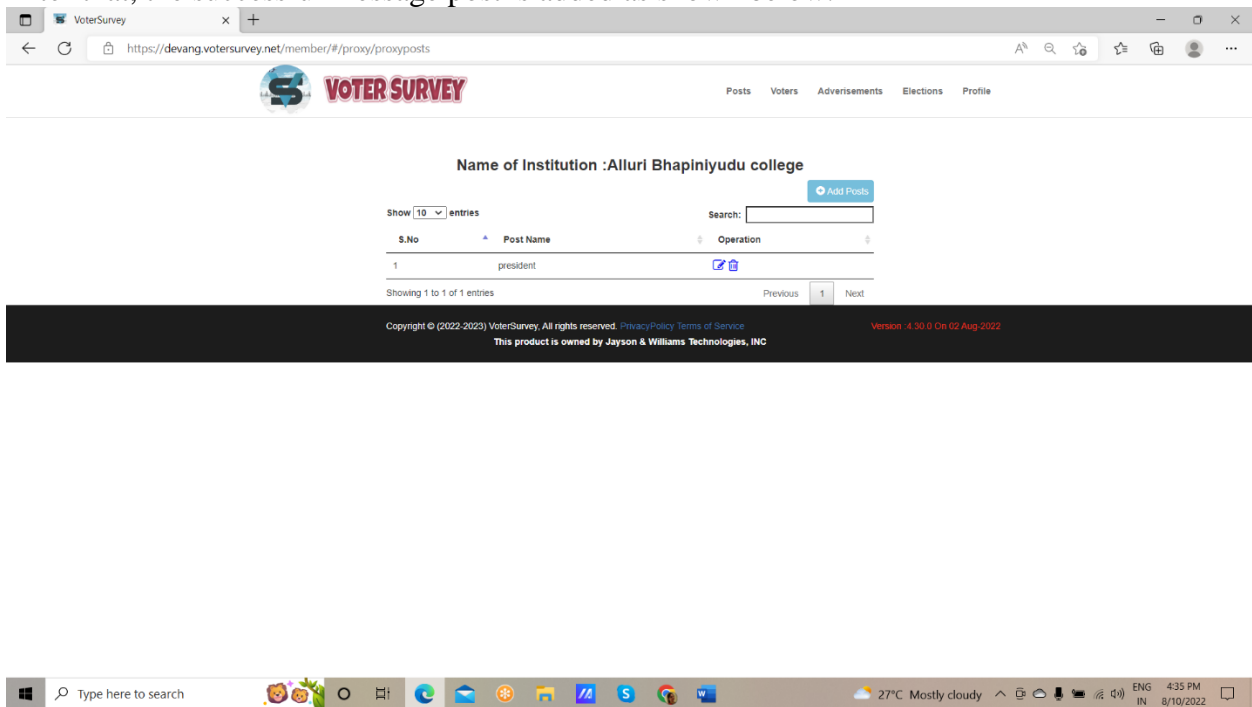

To add a post within the application:

1. Fill in the required details for the post.
2. Click on the "Add Post" button.
3. After clicking "Add Post," a success message will typically appear, confirming that the post has been added successfully.

This process allows users to share content within the application, and the success message provides reassurance that the post has been published as intended.

After that, the successful message post is added as shown below.

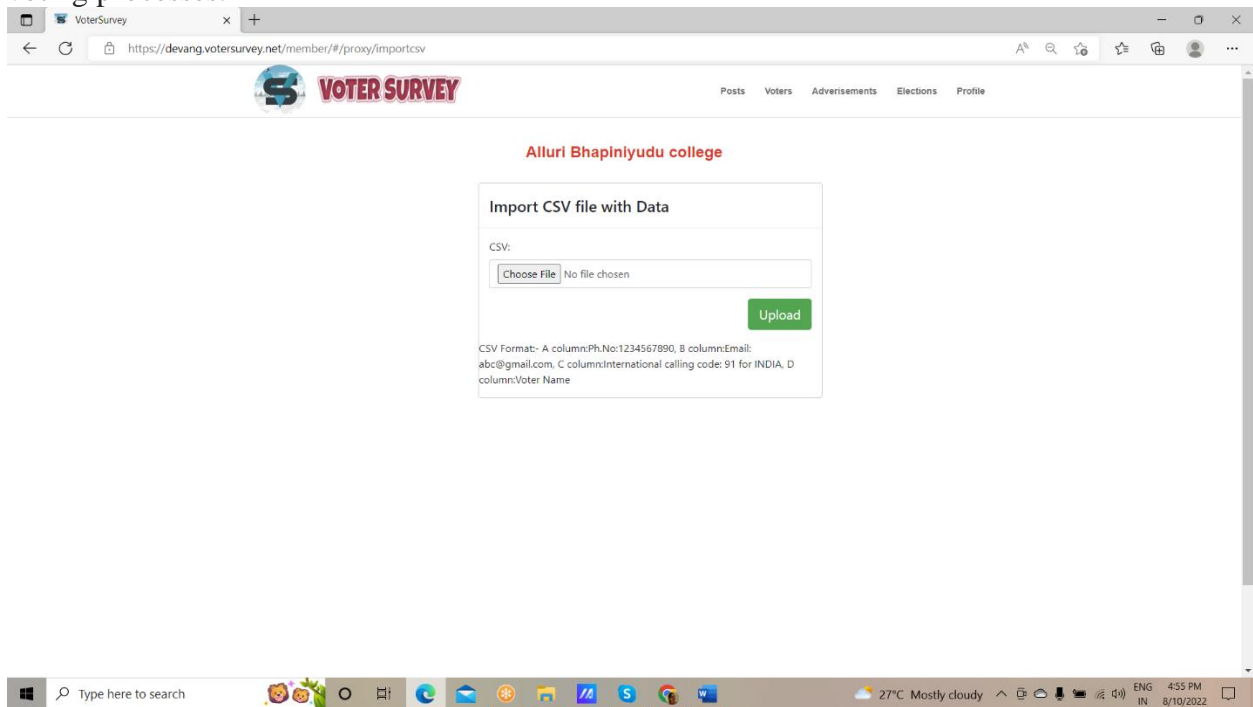

This tab has edit and delete options. It is used for editing posts and deleting posts.

3.3.1.3 Importing voters: -

In the application, the process of managing voter data typically involves the following actions:

1. **Import Voters:** Users can import voter data by selecting a CSV format file. Only the voters listed in the CSV file will be eligible to vote.
2. **Edit Voter Details:** Users have the option to edit voter details by clicking on the "Edit" option. This allows for updates or corrections to voter information.
3. **Delete Single Voter:** Users can delete individual voters by clicking on the "Delete" button next to a specific voter's record.
4. **Delete All Voters:** There is usually an option to delete all voters in the list by clicking on the "Delete All" option. This action removes all voter records from the system.

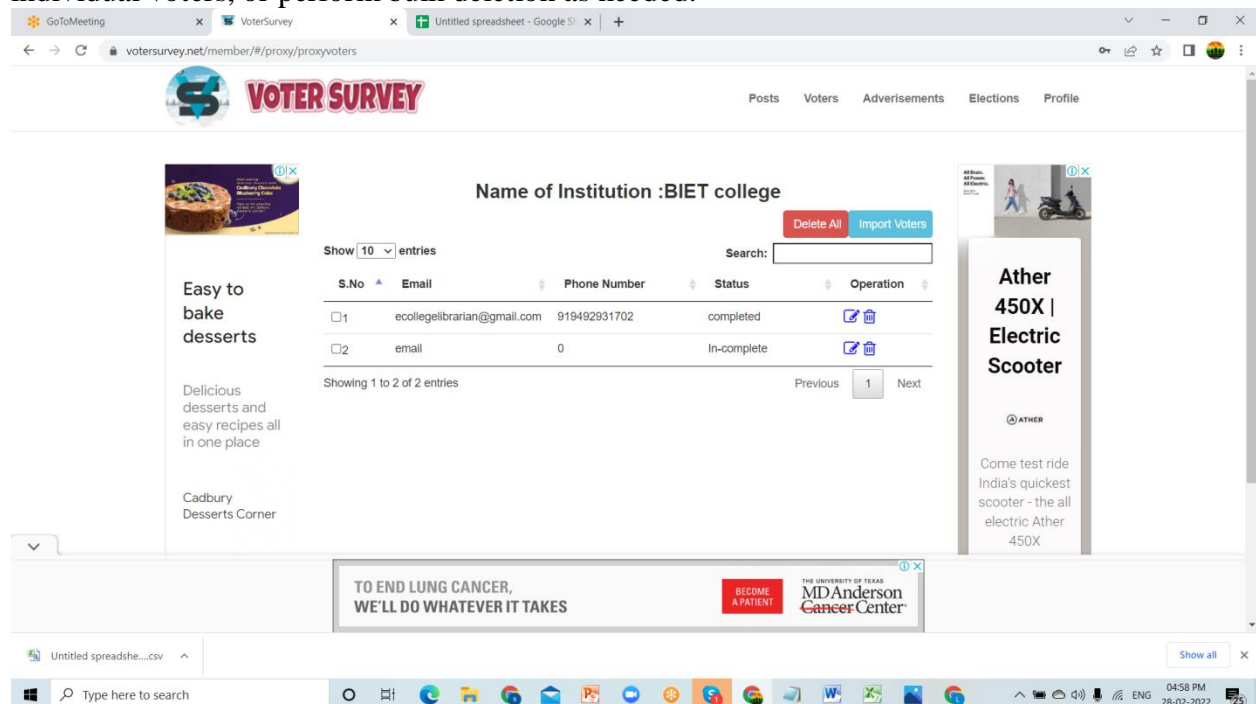

These features provide administrators or users with the capability to manage voter data effectively, ensuring that only eligible voters are registered and able to participate in elections or voting processes.

Users have the ability to manage voter data efficiently within the application through the following options:

1. **Edit Voter Data:** Voter details can be easily edited by clicking on the "Edit" option associated with a specific voter. This feature allows users to make necessary updates or corrections to individual voter information.
2. **Delete Single Voter:** To remove a single voter from the system, users can click on the "Delete" button next to that specific voter's record.
3. **Delete All Voters:** For bulk removal, there is usually an option to delete all voters at once. Users can do this by clicking on the "Delete All" option, which removes all voter records from the system.

These features streamline the management of voter data, offering the flexibility to edit, delete individual voters, or perform bulk deletion as needed.

3.3.1.4. Advertisements: -

The registrar can easily add the advertisements by clicking on the "add election button."

3.3.1.4. ResetPassword: -

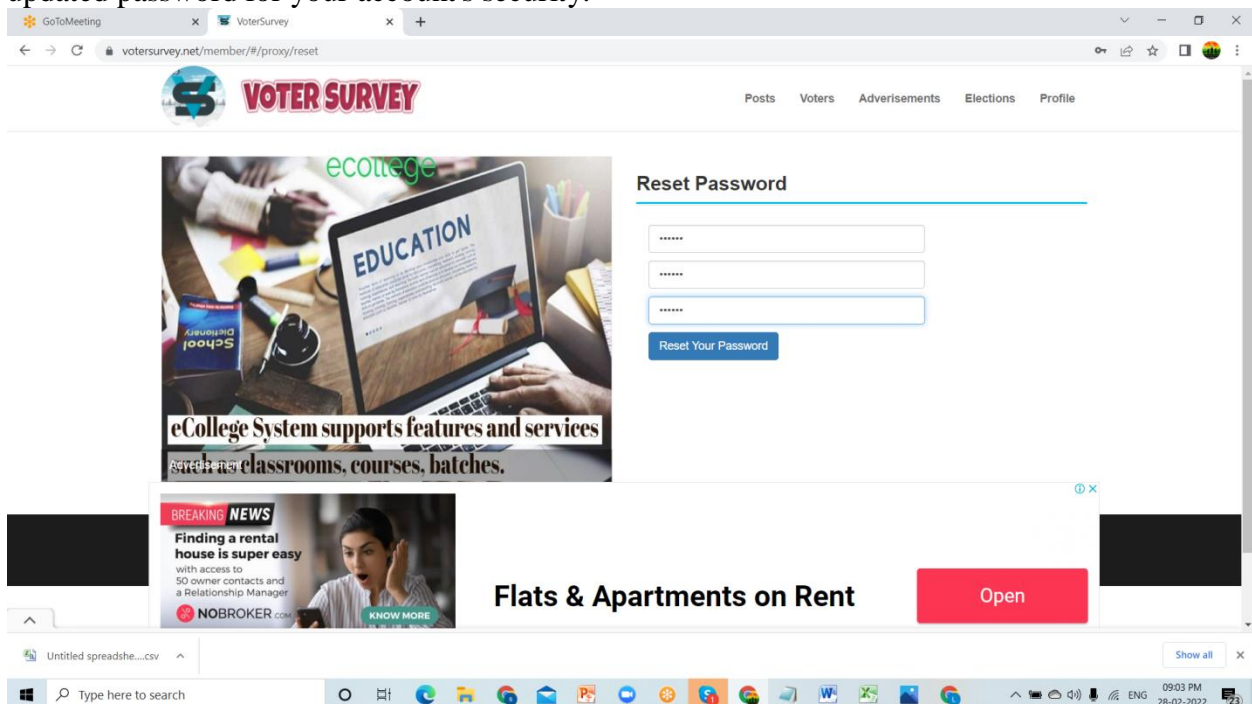

The registrant can easily change his password by clicking on the Reset password option, which was present on the top of the screen.

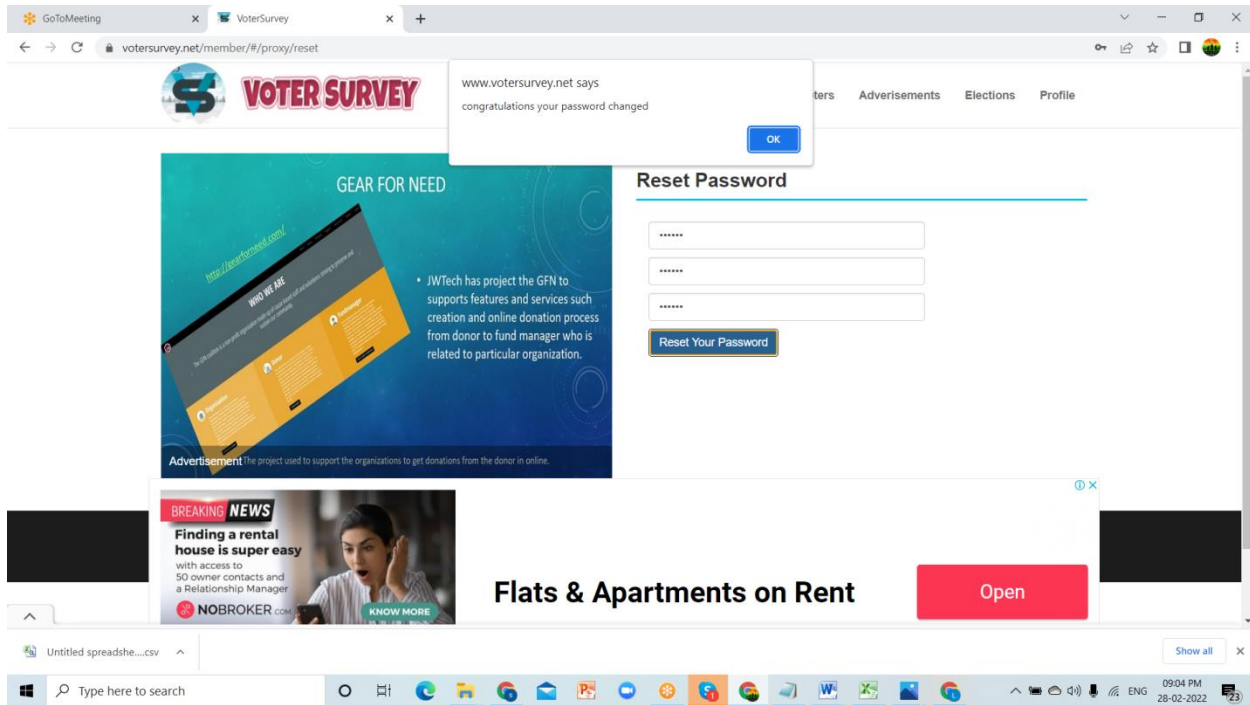

When you click on the "Reset Password" option, a window typically opens for resetting your password. The process generally involves these steps:

1. ****Enter Old Password:**** Provide your current or old password as a security measure to verify your identity.
2. ****Enter New Password:**** Input the new password you want to set for your account.
3. ****Retype New Password:**** To ensure accuracy, retype the new password.
4. ****Click "Reset Your Password":**** After completing the necessary fields, click the "Reset Your Password" or similar button to confirm your new password.

Following these steps, your password will be successfully reset, allowing you to log in with the updated password for your account's security.

3.3.1.5. Updateprofile: -

Registered users can easily update their profile information in the application by following these steps:

1. Click on the "Profile" option located at the top of the screen.
2. Access the profile editing page to make changes.
3. Edit the required profile details, such as name, email, or phone number.
4. Save the changes by clicking on the "Submit" or similar option.

This user-friendly process enables individuals to maintain accurate and up-to-date profile information within the application.

3.3.2 Voters login: -

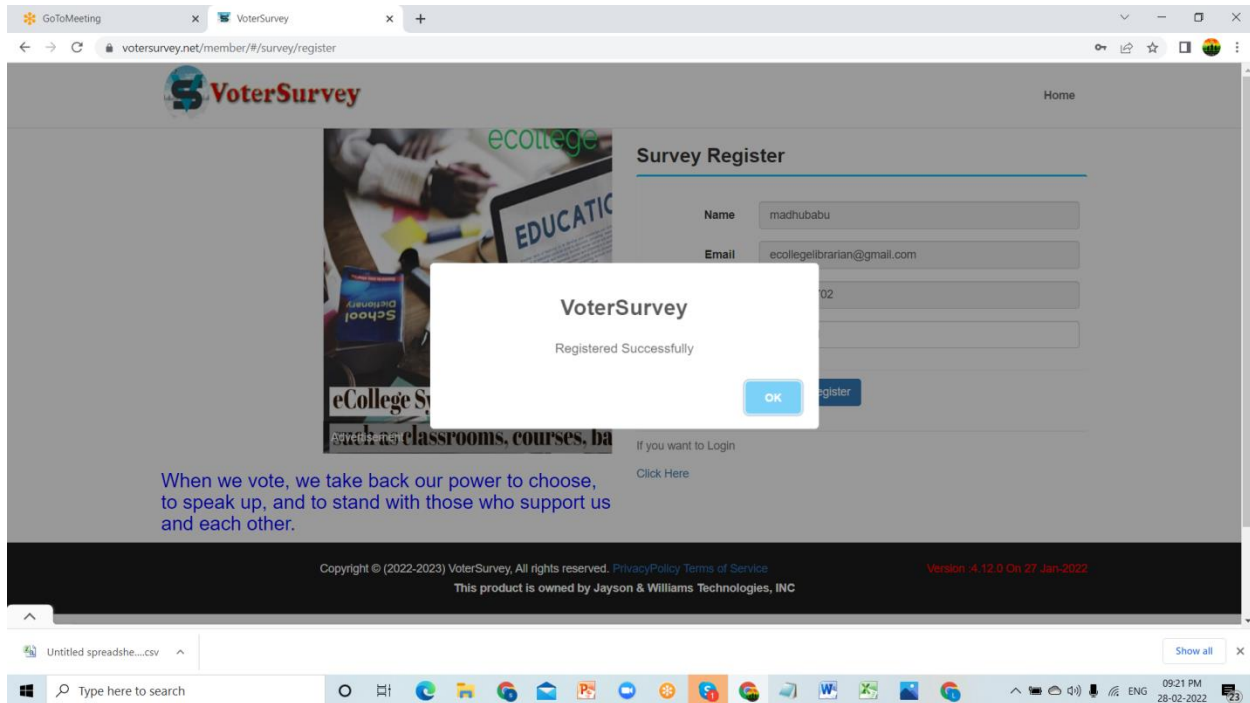

Voters can typically log in by using their email credentials and selecting the institute or entity for which they want to cast their vote. This process allows voters to access the voting platform and participate in the voting process while ensuring their votes are counted for the specific institution or election they choose.

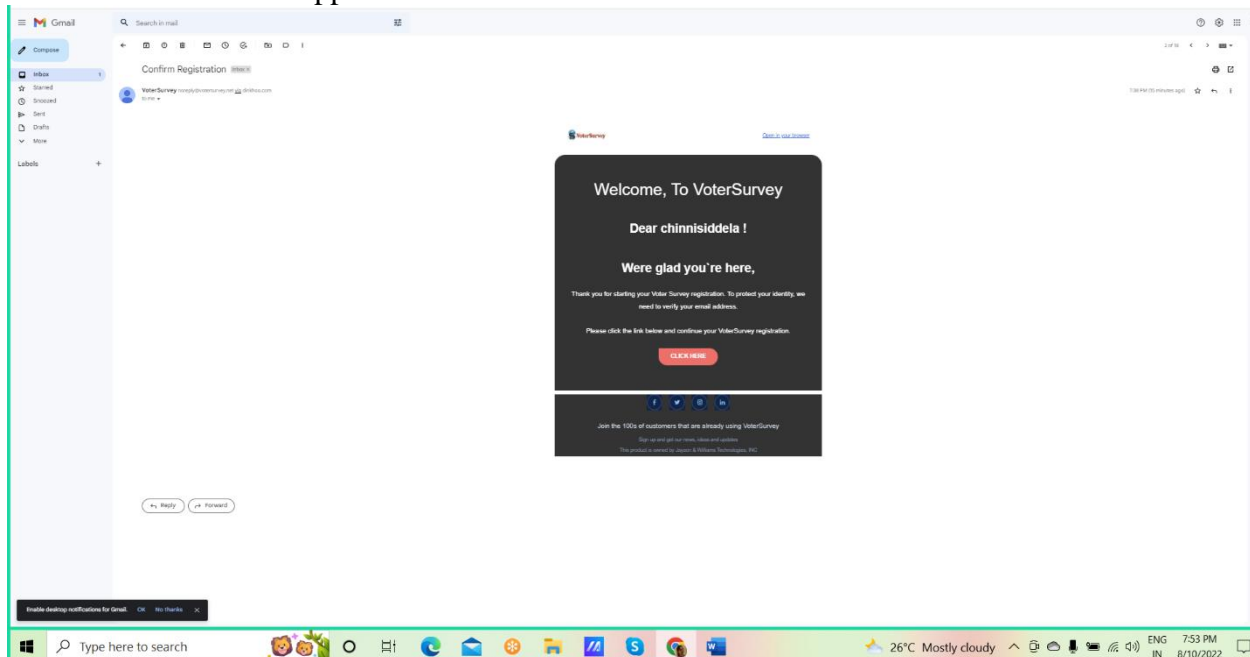

3.4. SurveyAdmin: -

To log in to the Survey Admin Login section, users must use their registered email and password and click the login button. This login process grants authorized access to the Survey Admin section for administrative tasks and application features.

When we vote, we take back our power to choose, to speak up, and to stand with those who support us and each other.

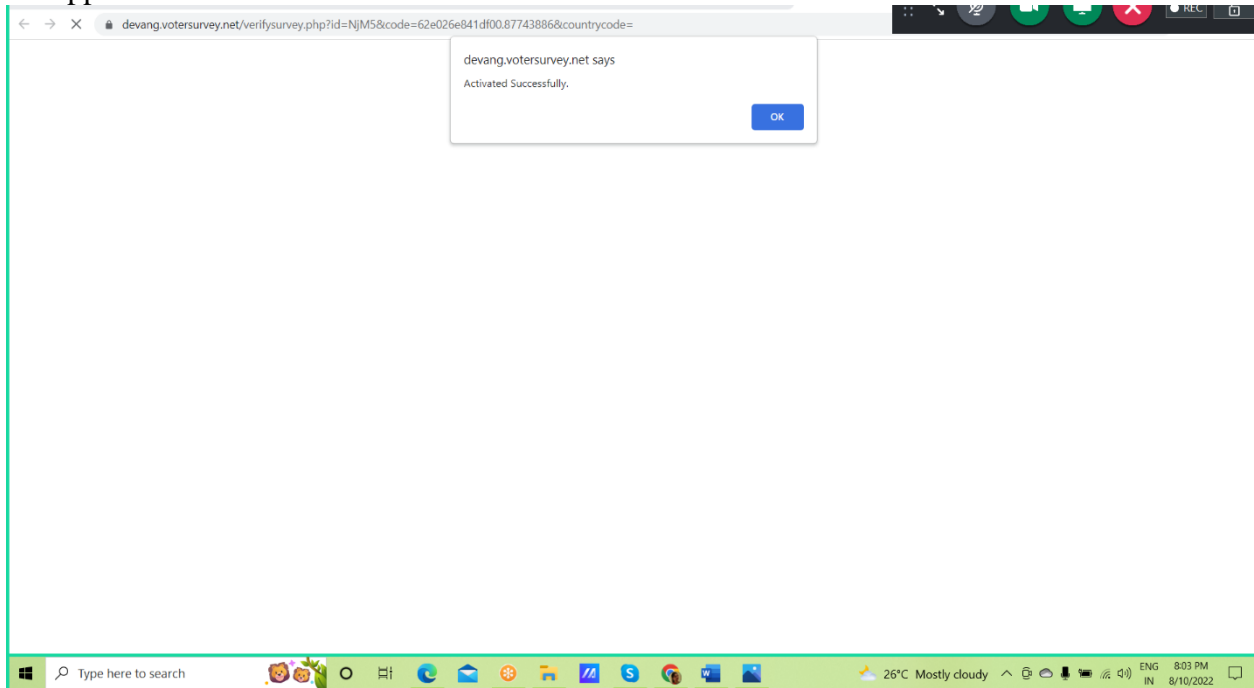

After successfully logging in or completing a certain action, users often receive a confirmation email in their provided email inbox. This email typically serves as a notification or confirmation of the completed action, ensuring that users are informed and aware of their successful interactions within the application.

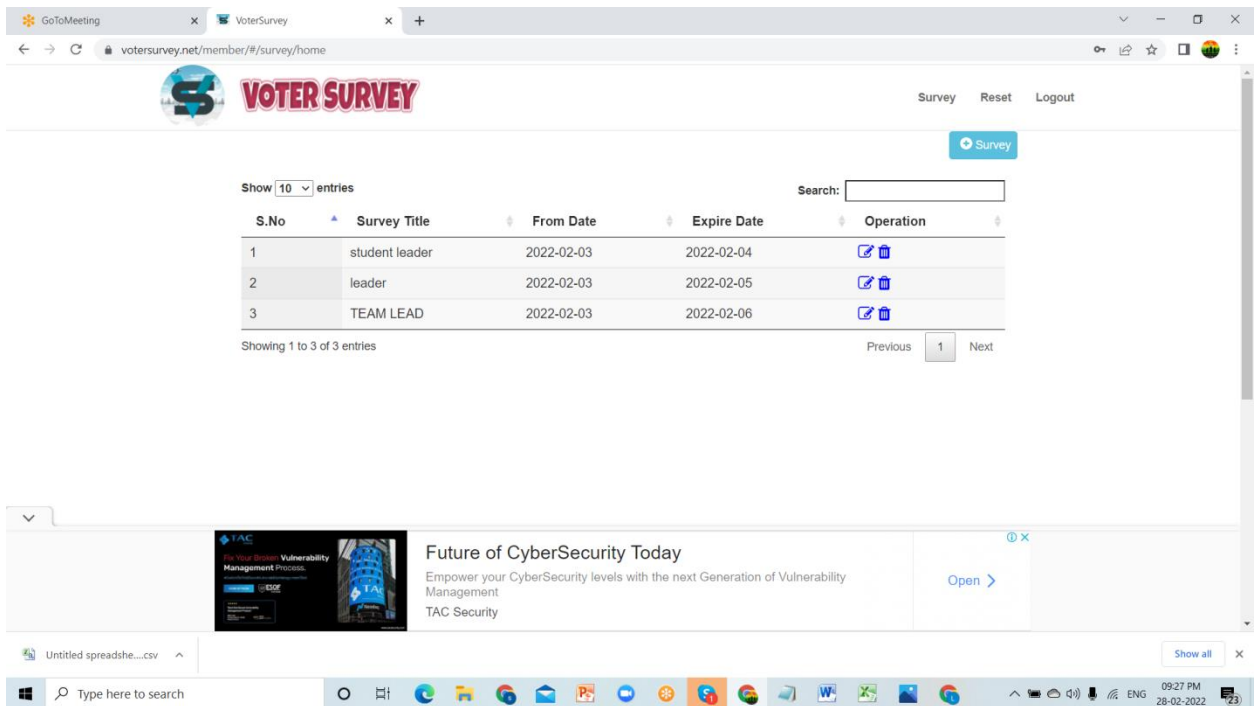

After receiving the confirmation email, users are typically instructed to click on the "Click Here" button within the email to activate their account or complete a specific action. Once they click this button, a success message, as shown in the figure, confirms that the activation process has been completed successfully. This ensures that users can fully utilize their accounts and access

the application's features.

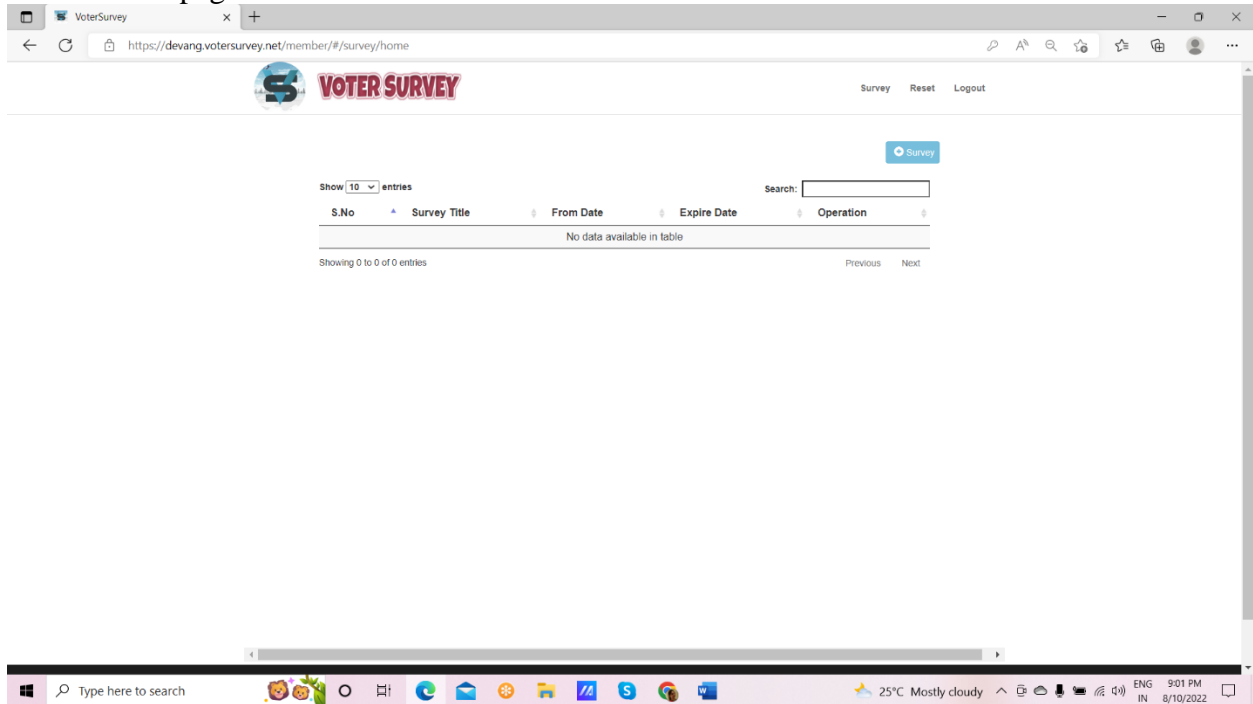

3.4.1. Survey Admin login: -

The survey admin should login with the email and password given while registering.

3.4.2. Creating Survey: -

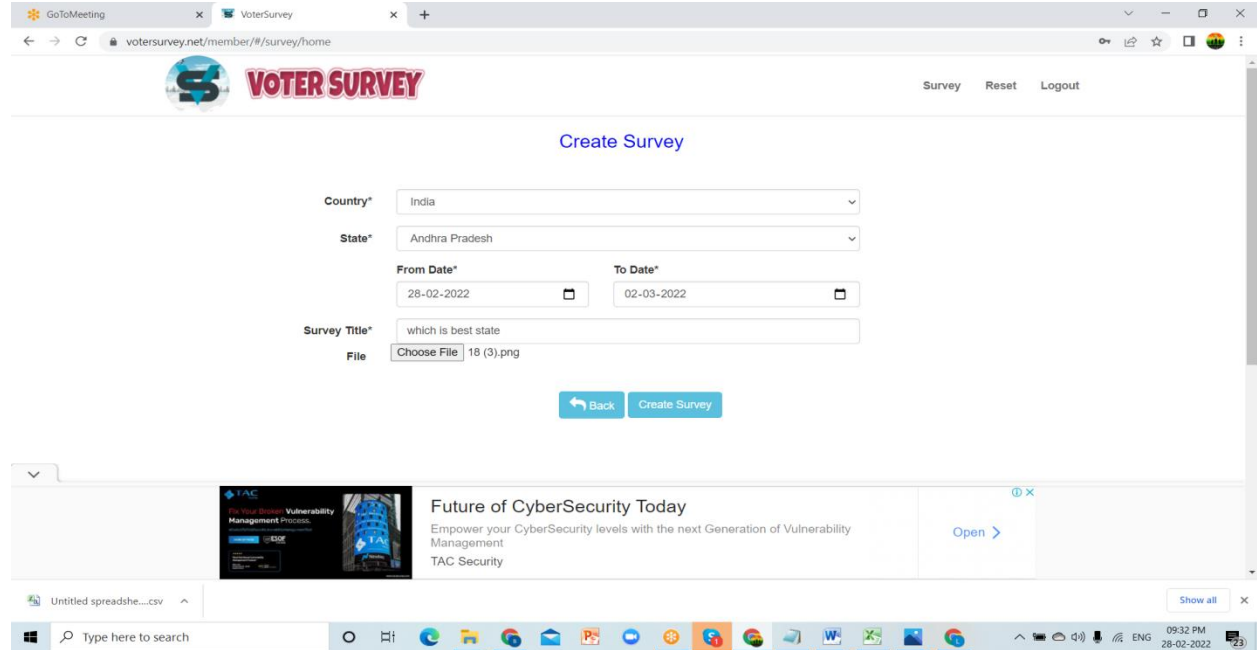

Your home page will open after you log in to Survey Admin. You have the "Ad Survey" button on this home page.

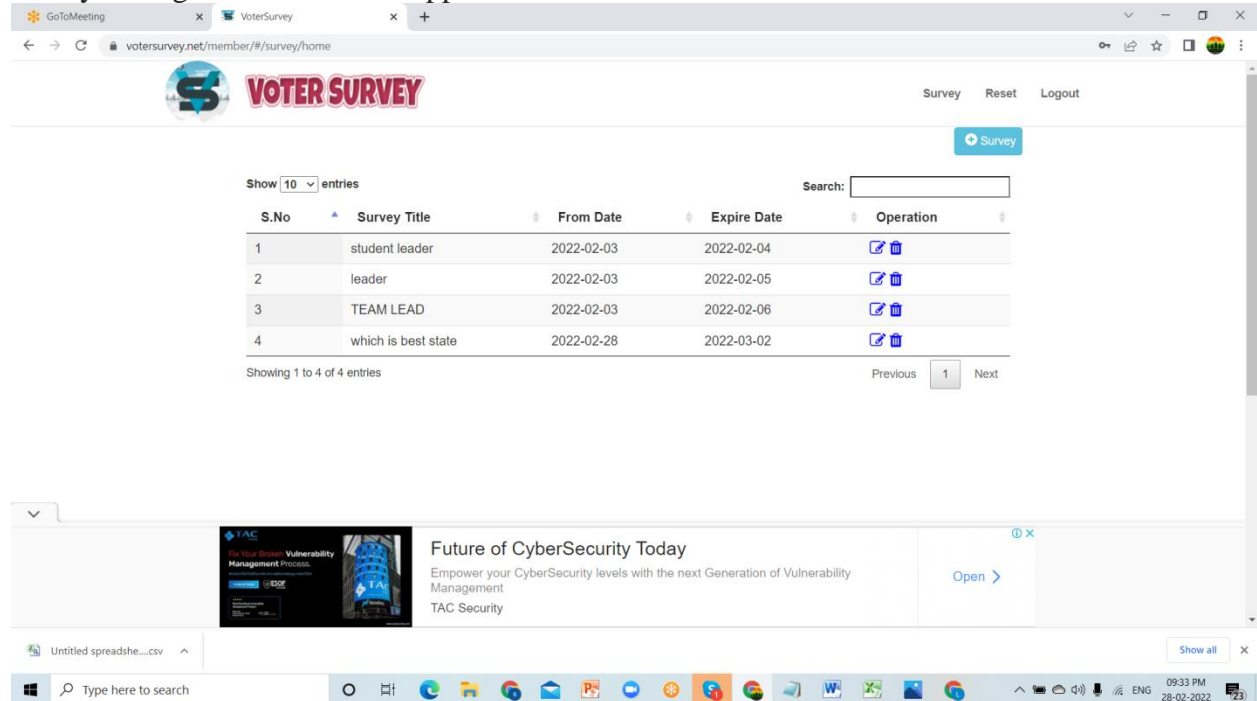

To create a survey in the Survey Admin section:

1. Click "Survey" or "Ad Survey."
2. Select the target country and state.
3. Set the survey start and end dates.
4. Create a survey title.
5. Click "Save" to create the survey.

This process enables administrators to configure and launch surveys within the application for data collection.

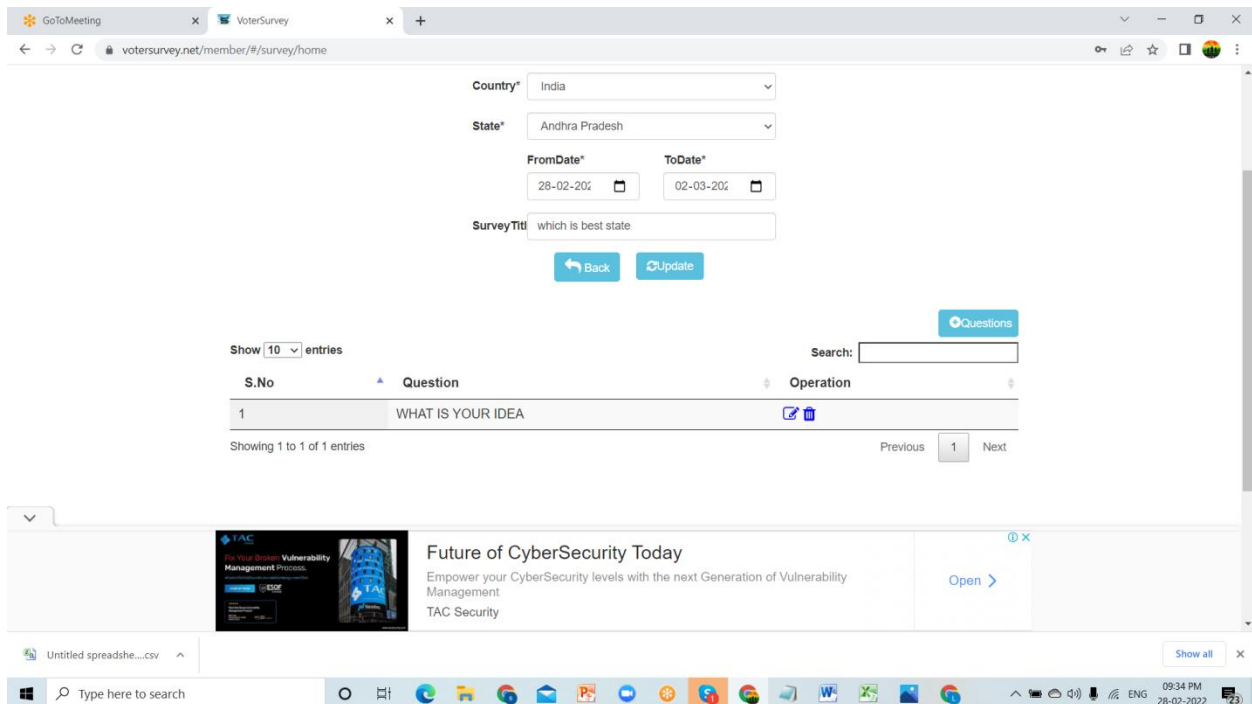

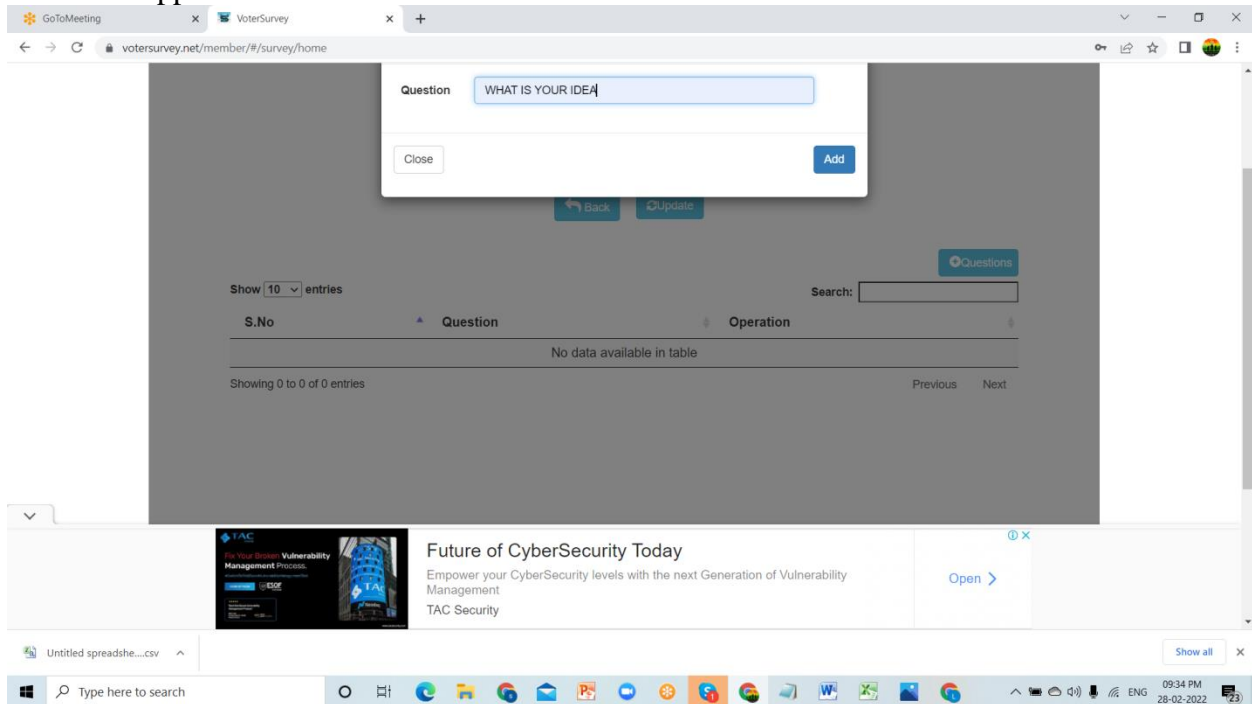

After creating survey details, they typically appear in a table format. Within this table, users usually have the option to edit or delete the survey entries. These options provide administrators with the flexibility to make changes to survey details or remove surveys as needed for effective survey management within the application.

In the "Edit" option for a survey, users can find a "Add Questions" button. When clicked, this button enables administrators to add survey questions, which are then displayed in a table for review and management. This simplifies the process of creating and organizing survey questions

within the application.

Administrators can add choices to survey questions by clicking the "Edit" button within the question operations and using the "Add" button to insert new choices. This functionality enables the customization of survey questions by including a range of response options for survey

participants.

The screenshot shows the 'Voter Survey' web application interface. A modal dialog titled 'Add Choice' is open, allowing the user to add a new choice to a survey question. The 'Choice' field contains the text 'Delhi'. Below it, there is a 'Photo' field with a 'Choose File' button and the text 'Untitled.png'. At the bottom of the dialog are 'Close' and 'Add' buttons. In the background, a table is visible with columns 'S.No', 'Choice', and 'Operation'. The table is currently empty, displaying the message 'No data available in table'. The survey question being edited is 'which is best state'. The top navigation bar includes 'Survey', 'Reset', and 'Logout' links. The bottom of the screen shows a Windows taskbar with various application icons and the system clock indicating 10:36 PM on 28-02-2022.

This screenshot shows the 'Voter Survey' web application after the choice has been successfully added. A green notification banner at the top reads 'success ! Added successfully.'. The survey question is now 'WHAT IS YOUR IDEA'. Below the question, there are 'Back' and 'Update' buttons. The table below the question now contains one entry: S.No: 1, Choice: Delhi. The table has columns 'S.No', 'Choice', and 'Operation'. The 'Operation' column for the entry '1' and 'Delhi' contains icons for viewing, editing, and deleting. The 'Add Choice' button is still visible in the top right corner of the table area. The bottom of the screen shows the same Windows taskbar as the previous screenshot, with the system clock now indicating 10:37 PM on 28-02-2022.

Click on the update button to update the options to the question.

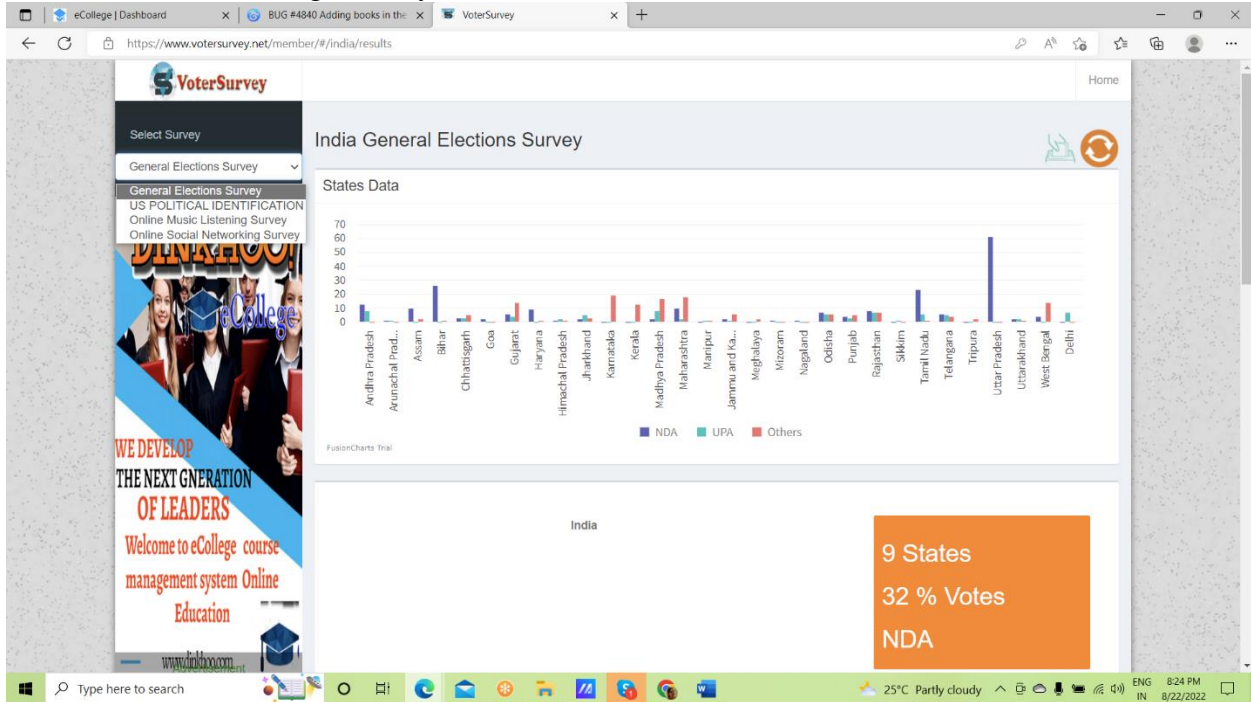

The screenshot shows a web browser window with the URL `votersurvey.net/member/#/survey/home`. The page features the 'VOTER SURVEY' logo and navigation links for 'Survey', 'Reset', and 'Logout'. A green notification bar at the top indicates 'sucess ! Updated successfully.'. Below this, the survey title 'which is best state' is displayed. A 'Question' field contains the text 'WHAT IS YOUR IDEA'. There are 'Back' and 'Update' buttons. A table lists survey entries with columns for 'S.No', 'Choice', and 'Operation'. The table contains two rows: one for 'Delhi' and one for 'Maharastra'. A 'Choice' button is visible to the right of the table. Below the table, there is a section titled 'Future of CyberSecurity Today' with a description and an 'Open >' link. The Windows taskbar at the bottom shows the time as 10:39 PM on 28-02-2022.

S.No	Choice	Operation
1	Delhi	
2	Maharastra	

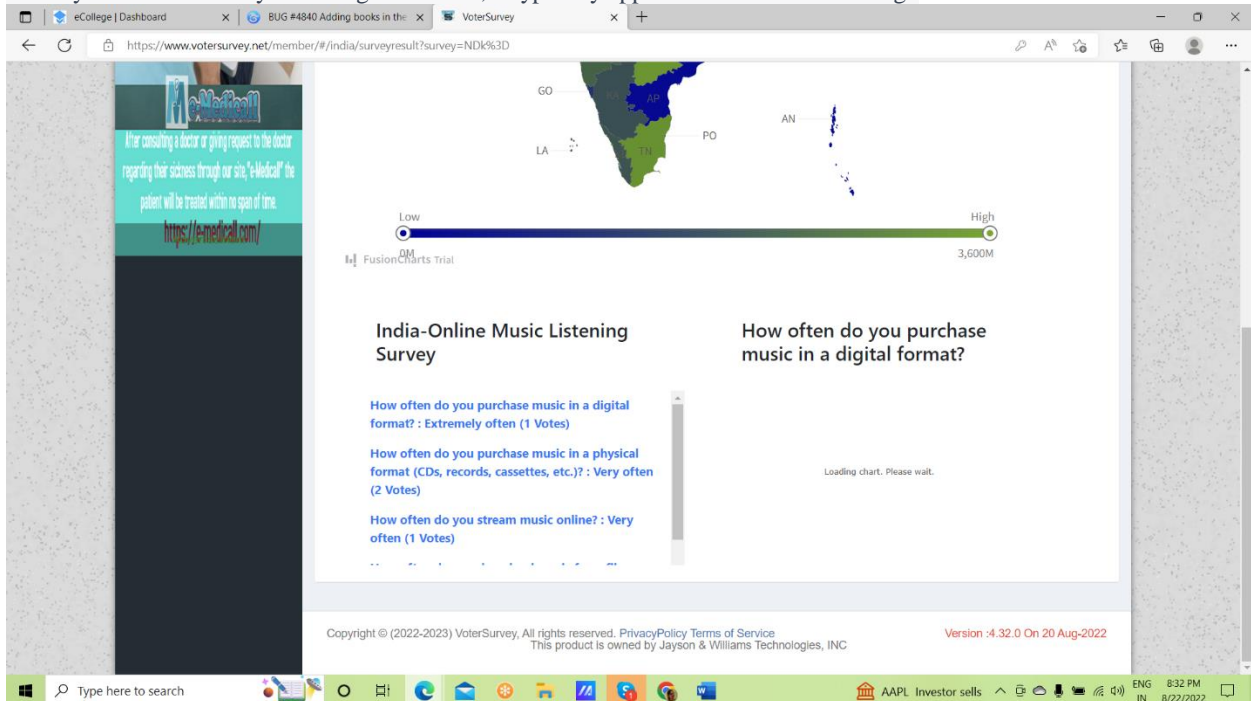

Once a survey is completed, it typically appears on the dashboard. Users can access completed surveys by following these steps:

1. Go to the dashboard.
2. Click on the "Select Survey" or a similar option.

3. In the drop-down menu, users will find the name of the survey they have completed, allowing them to review or manage survey data as needed.

When you create a survey and assign it a name, it typically appears as shown in the image

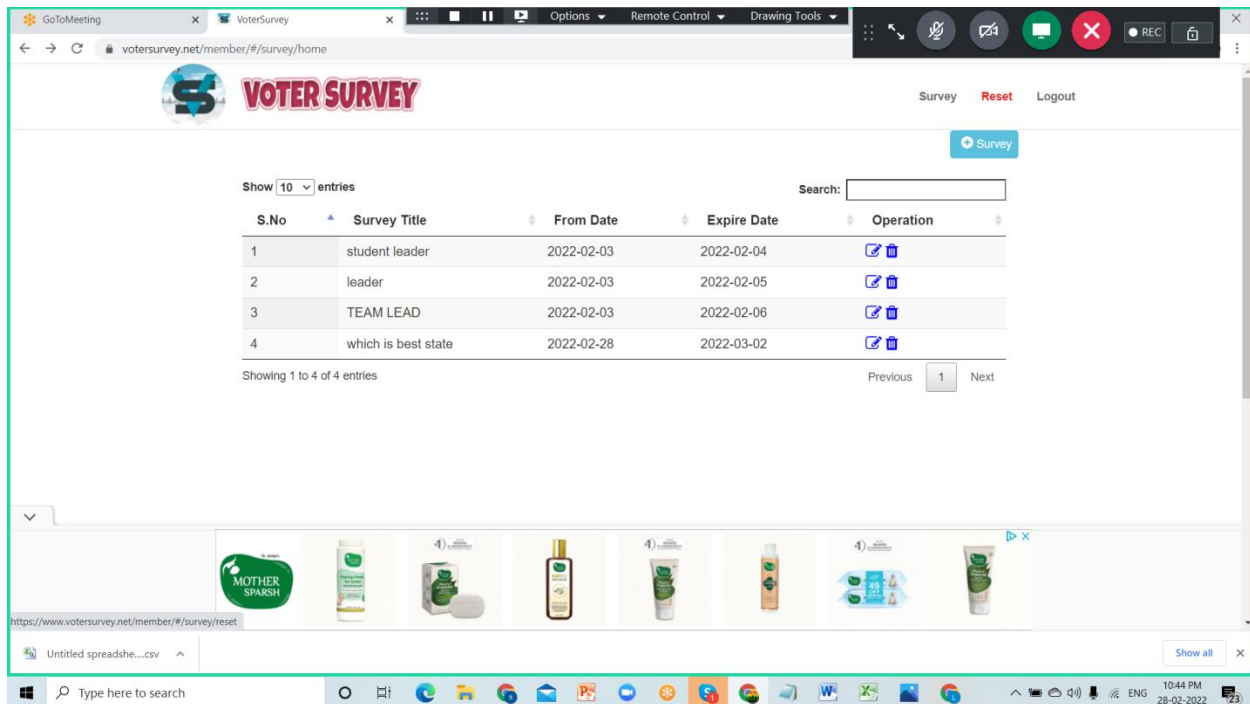

In the figure you mentioned, it likely displays the number of votes that a particular survey has received. This vote count provides administrators or users with valuable information about the

survey's response rate and engagement level. It can be used to assess the effectiveness and reach of the survey within the application.

3.4.3. Resetpassword: -

The survey admin can easily reset his password by clicking on the reset button.

When a user clicks on the "Reset Password" option, a window typically opens to facilitate the password reset process. This process commonly involves the following steps:

1. Enter the Old Password: The user provides their current or old password as a security measure to verify their identity.
2. Enter the New Password: The user inputs the new password they want to set for their account.
3. Retype the New Password: To ensure accuracy, the user re-enters the new password.
4. Click "Reset Your Password": After completing the required fields, the user clicks on the "Reset Your Password" or a similar button to confirm and save the new password.

By following these steps, the user's password is successfully reset, ensuring the security and access to their account with the updated password.

The image shows a sequence of two screenshots from a web browser, illustrating the password reset process on the VoterSurvey website.

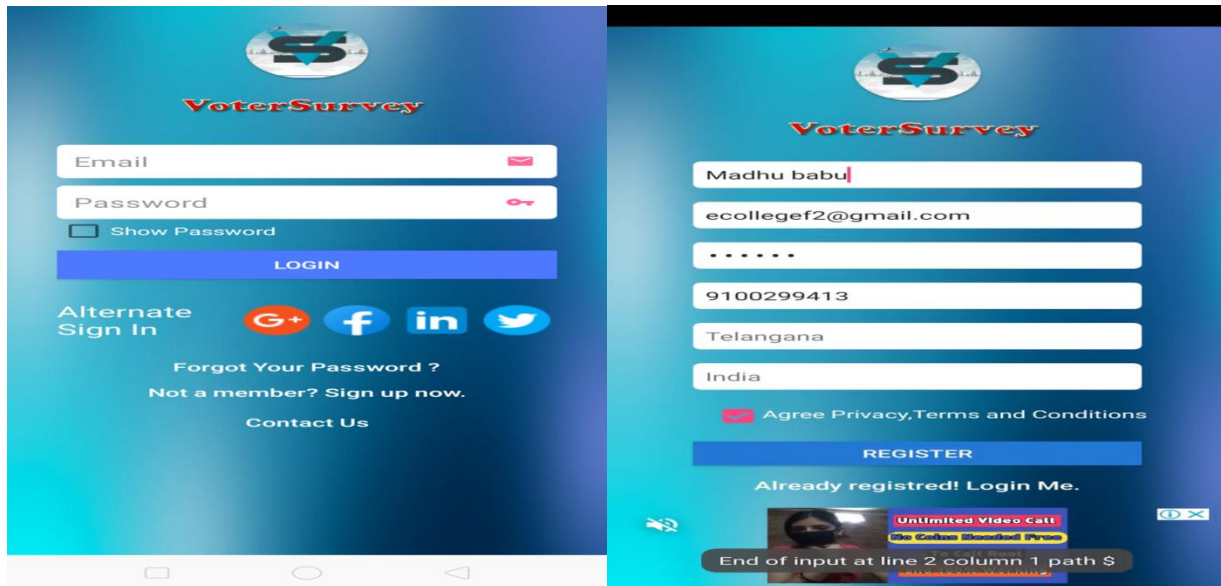

Top Screenshot: The browser address bar shows the URL `votersurvey.net/member/#/survey/reset`. The website header includes the "VoterSurvey" logo and navigation links for "Survey", "Reset", and "Logout". A large advertisement for "KRIMEWATCH" is displayed on the left, featuring a hand holding a camera and the text: "Every Cell can be a CC Camera. Beware, *KrimeWatch* every where, in order for a society to be a safe place to live in, all society members including the governments and people must take necessary measurements to keep it a crime-free place". On the right, the "Reset Password" section contains three input fields for password entry and a "Reset Your Password" button.

Bottom Screenshot: The browser address bar remains the same. The website content is dimmed, and a modal dialog box is centered on the screen. The dialog box has the title "VoterSurvey" and the message "Congratulations your password changed". An "OK" button is located at the bottom right of the dialog. The background advertisement has changed to one for "DINKHOO! College" with the text: "WE DEVELOP THE NEXT GENERATION OF LEADERS Welcome to eCollege management system Education www.dinkhoo.com".

Voter survey Android

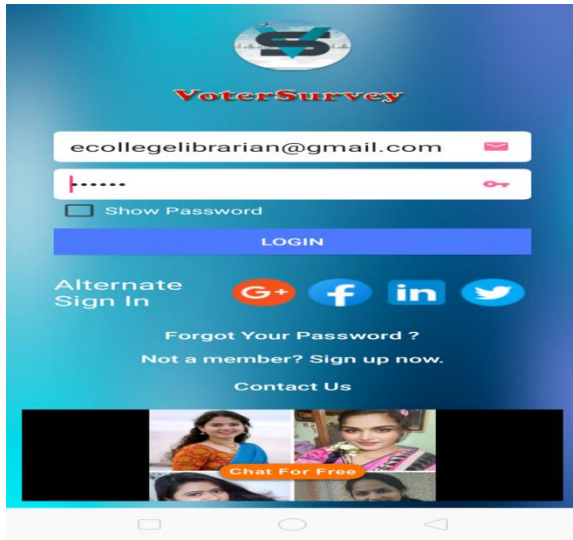

1.Registration: -

New users can easily register by clicking on the "sign up now" option which was given on the login page. While you are registering, you should give your name, email, password, and phone number, and you should also keep your device location option on so that the application will verify your location and give your state and country automatically.

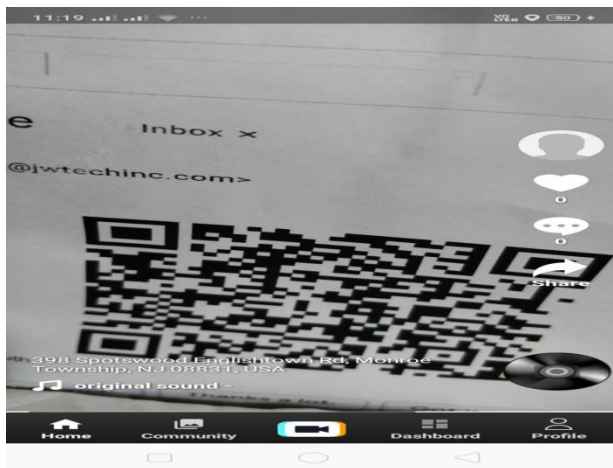

1.1.login: -

The user can easily login by entering his email and password, which were given while registering for the application.

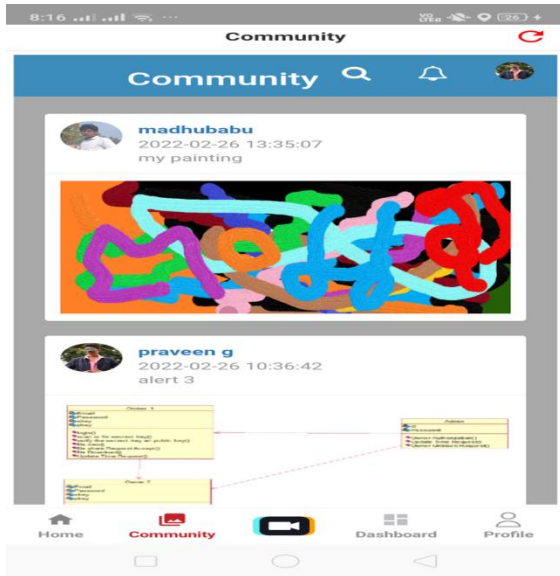

2.Home tab: -

When you log in to the application, the first tab is the home tab, in which you will see the latest posts in the application. You can see all the posts by moving the screen upside down. You can easily share, like, or comment on each post by clicking on the icons that are given on the right side.

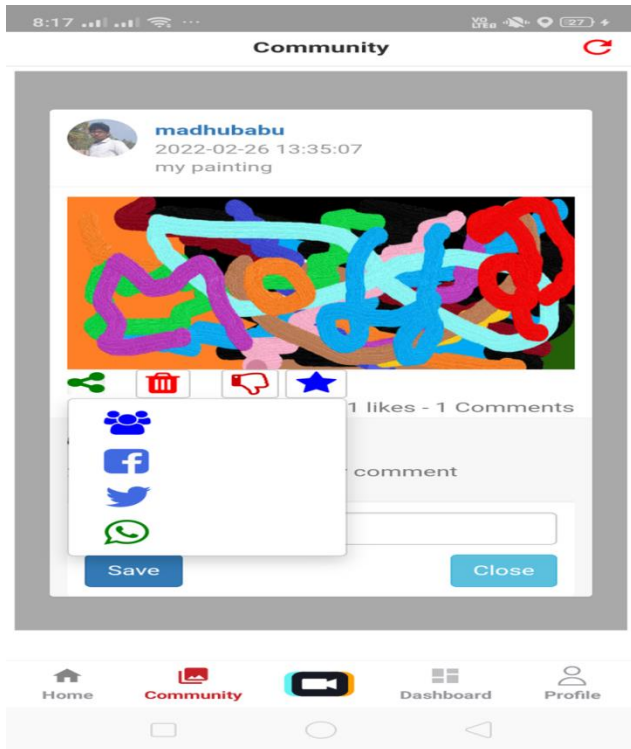

3. Community: -

When you log in to the application, the first tab is the home tab, in which you will see the latest posts in the application. You can see all the posts by moving the screen upside down. You can easily share, like, or comment on each post by clicking on the icons that are given on the right side.

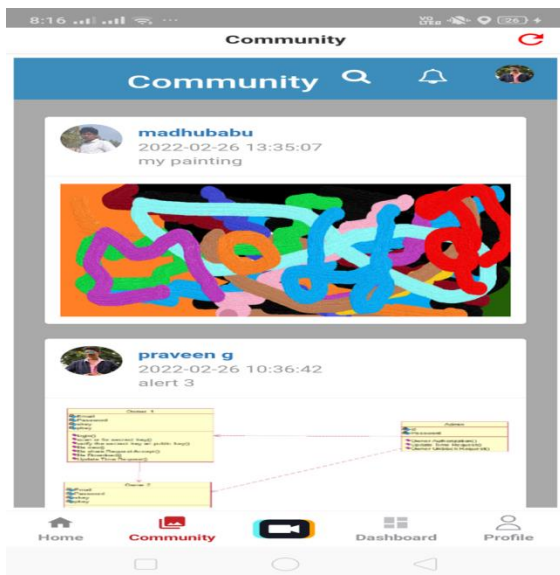

They can click on any post. The user gets a window like this: he can view the posts, and he can like, share, delete, and comment on those posts by clicking on the icons on that page.

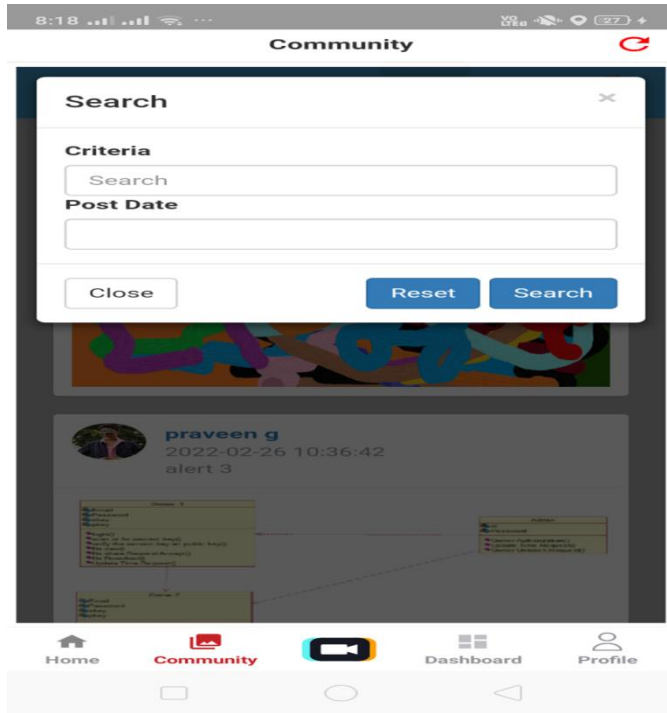

3.1. Search: -

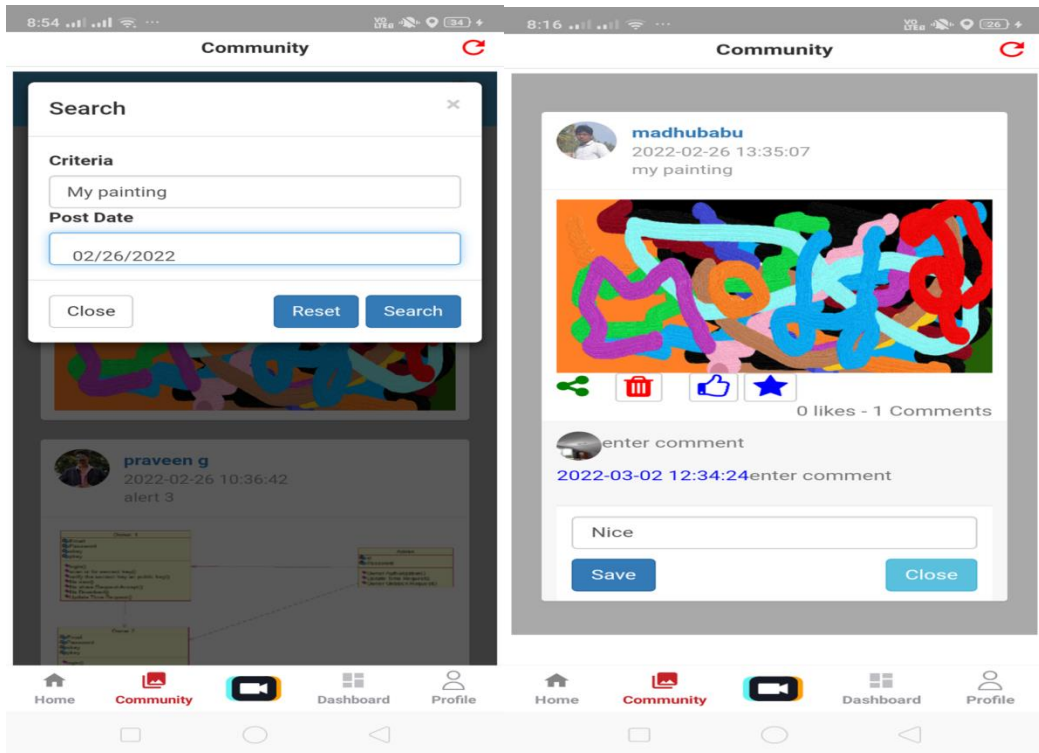

On the community page, the user can search for any post by clicking on the search option that was given on the community page.

On the community page, the user can search for any post by clicking on the search option that was given on the community page. Then the popup will appear like this.

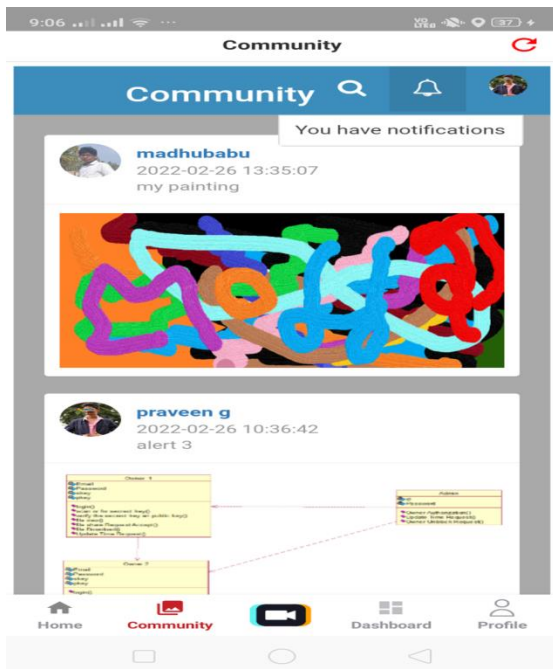

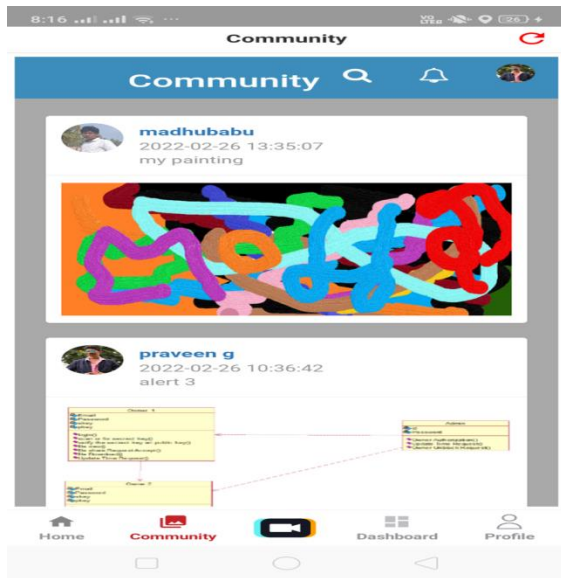

In this popup, you should enter the criteria and postdate and click on the search button. If you enter the wrong details, you can click on the reset button. You can then give the new details and search, and the certain post will appear.

3.2. Notifications: -

On the community page, the user can view his notifications by clicking on the bell icon, which was given at the top of the community page.

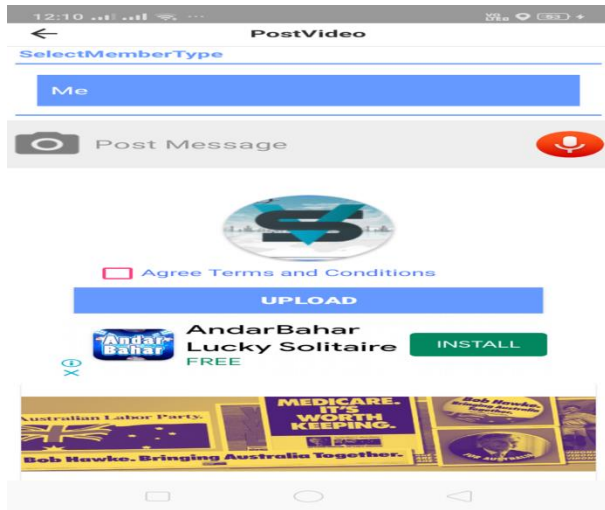

4. Our posts: -

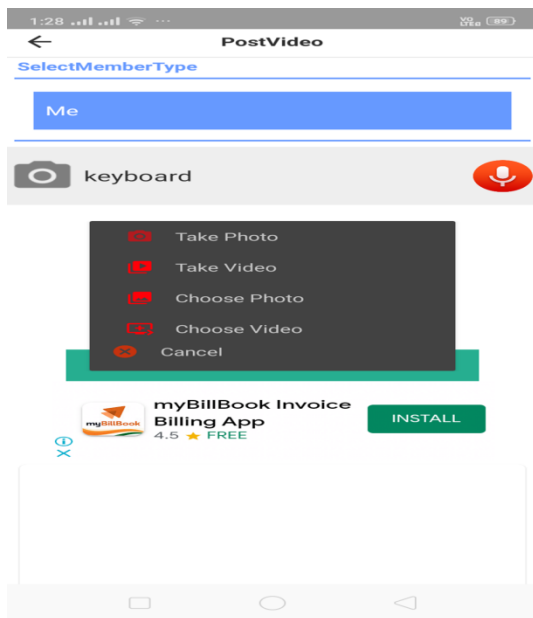

The user can post any video, audio, or photo by clicking on the camera option, which was present in the middle of the screen.

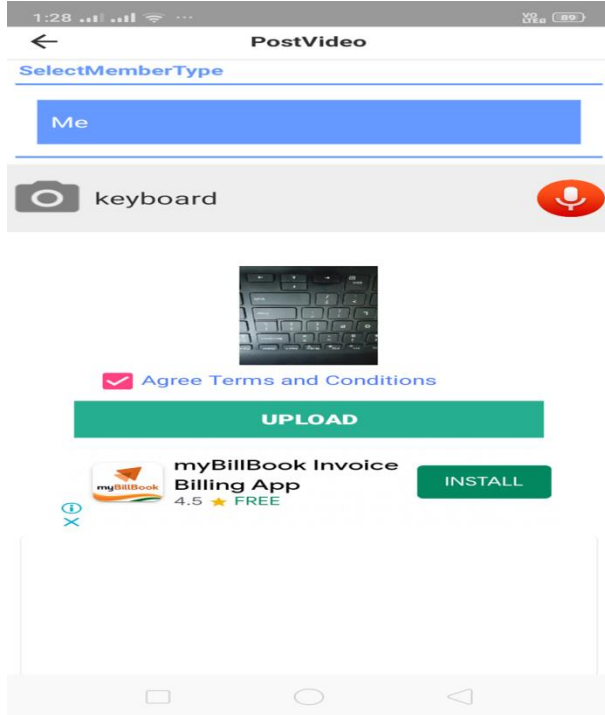

Before uploading anything, while clicking on the select member type and whether it is public or private,

Or to be visible to me or the college, you can click on the camera icon. You have four options You can also take photos, take videos, choose a photo, or choose a video, and you can also record audio files by clicking on the audio icon, and you can upload them into the cloud.

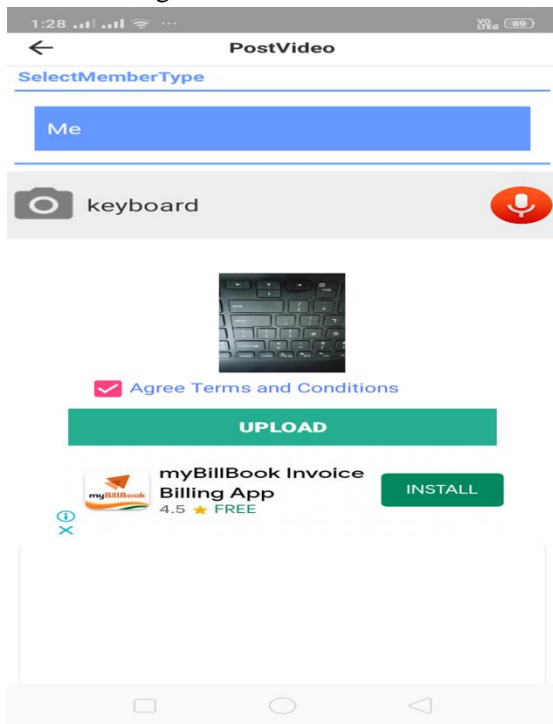

4.1. Takephoto: -

When you click on the "take a photo" option, it will redirect you to your mobile camera, and you can take a picture of it, agree to the terms and conditions, and click on the upload options.

4.2. Takevideo: -

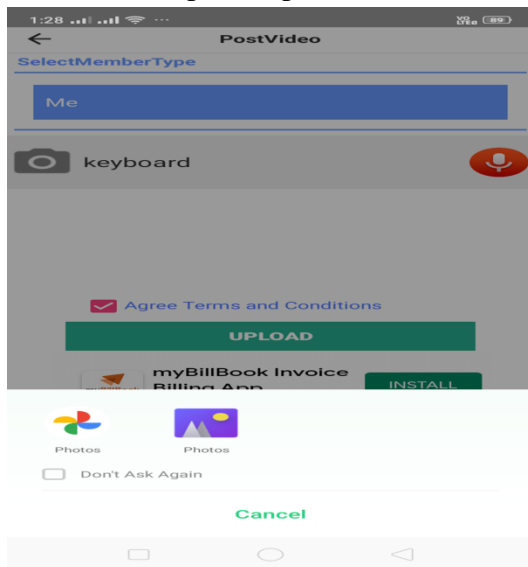

When you click on the "take video" option, it will redirect you to your mobile camera, and you can take a video of it, agree to the terms and conditions, and click on the "upload" option.

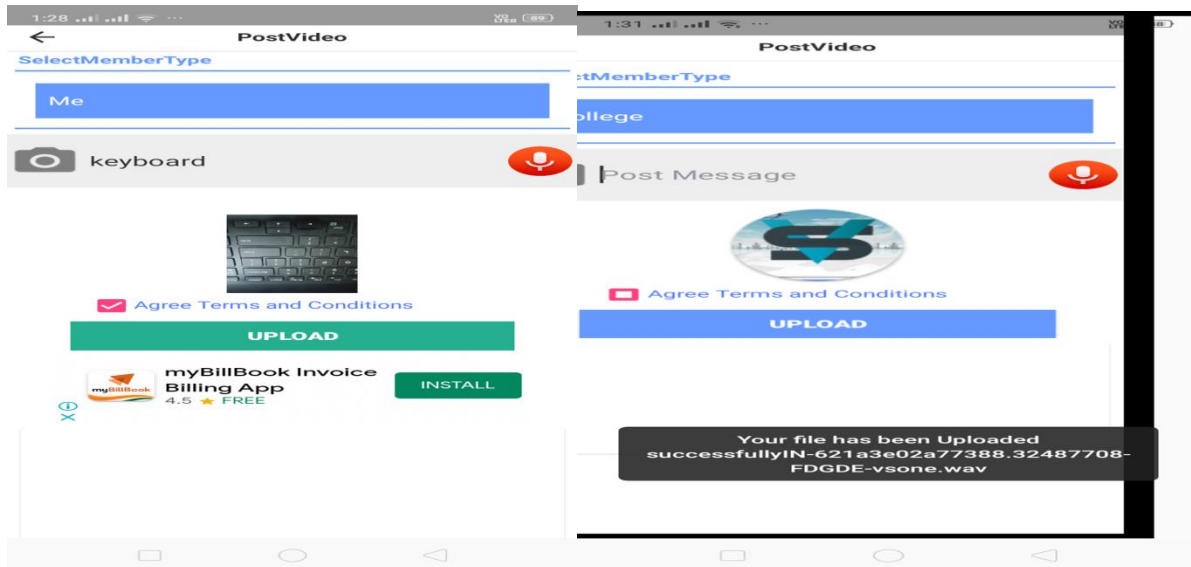

4.3. Choosephoto: -

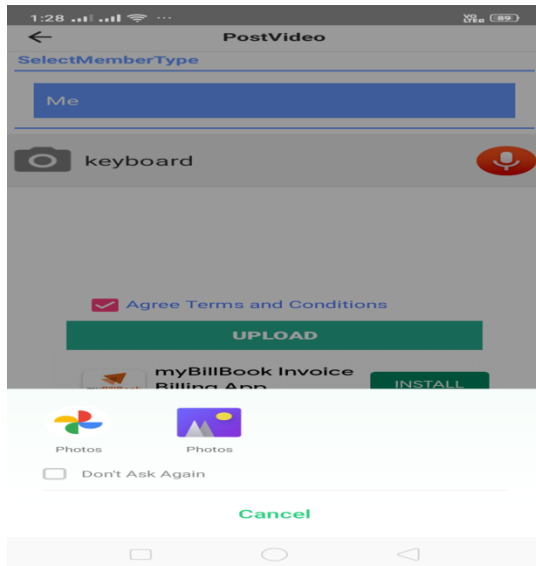

When you click on the choose photo option, then it will redirect you to your photos, which are present on your mobile, and you can choose the photo of it, agree to the terms and conditions, and click on upload options.

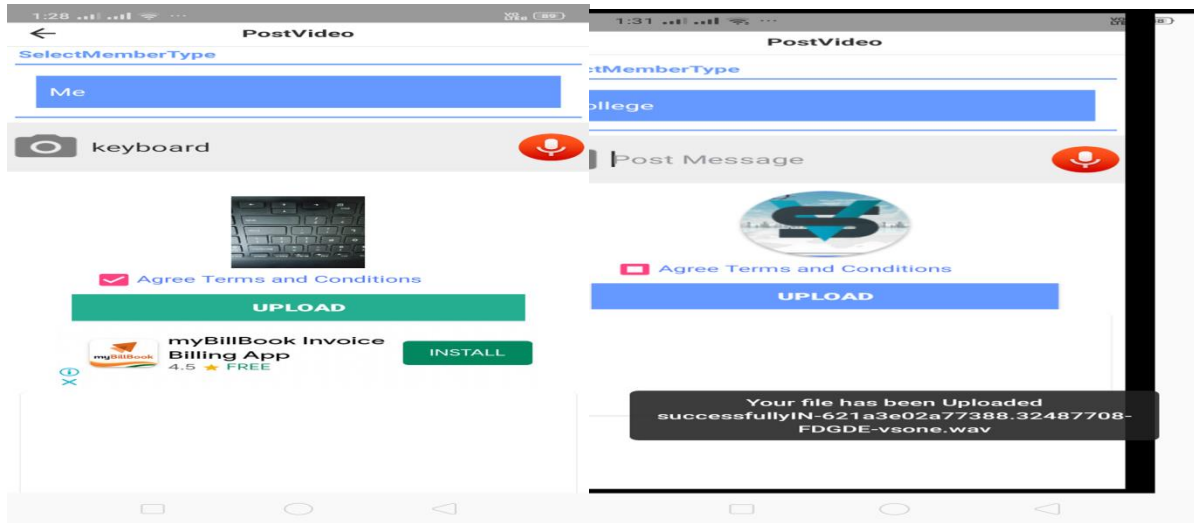

4.4. ChooseVideo: -

When you click on the choose video option, then it will redirect you to your videos which are present on your mobile, and you can choose the video of it and agree to the terms and conditions and click on the upload options.

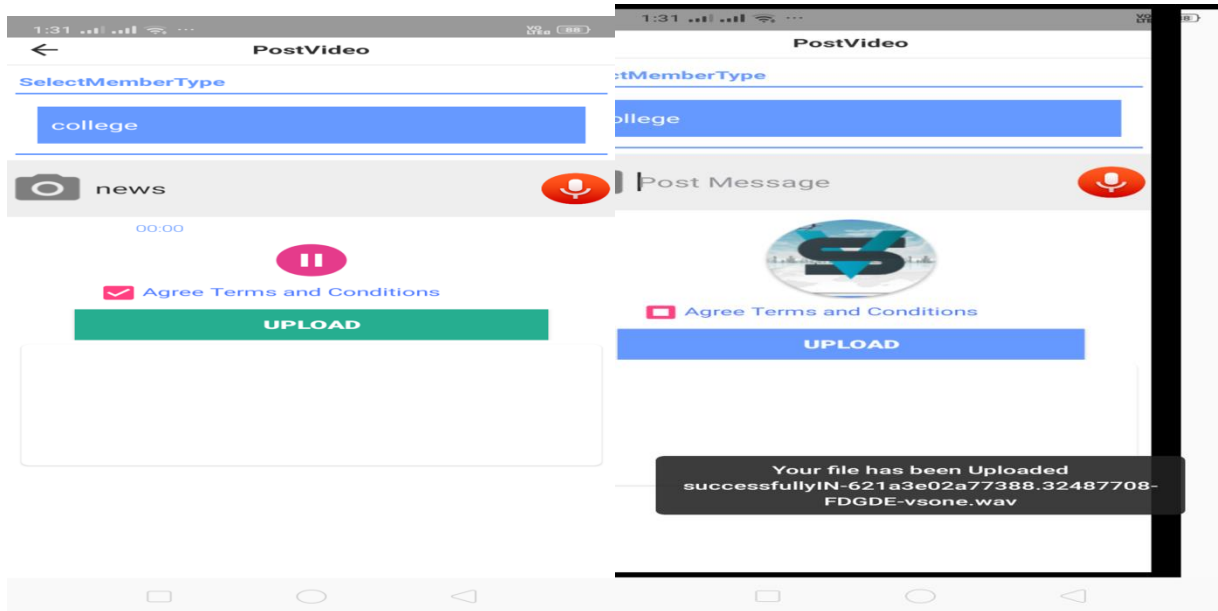

4.4. Audiofile: -

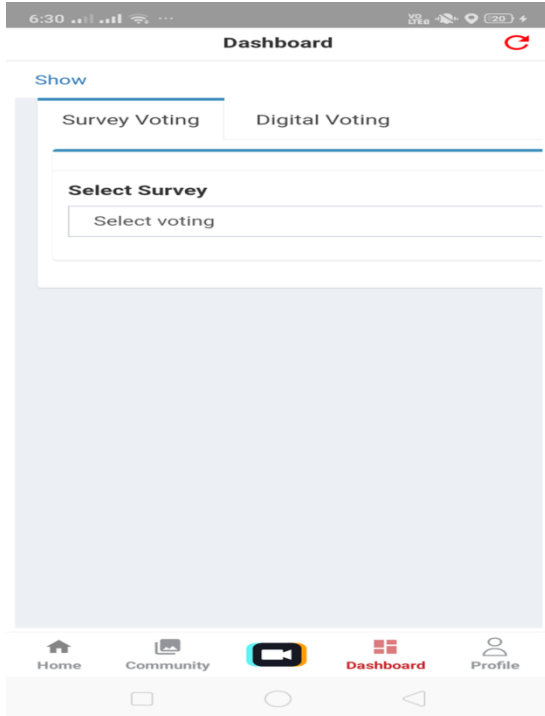

When you click on the audio option, it will turn on your microphone and start recording audio. After the recording is completed, agree to the terms and conditions, and click on the upload option.

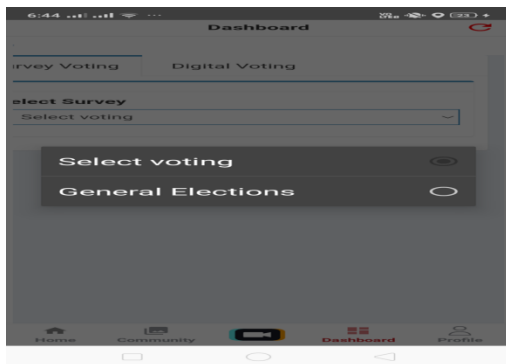

4. Dashboard: -

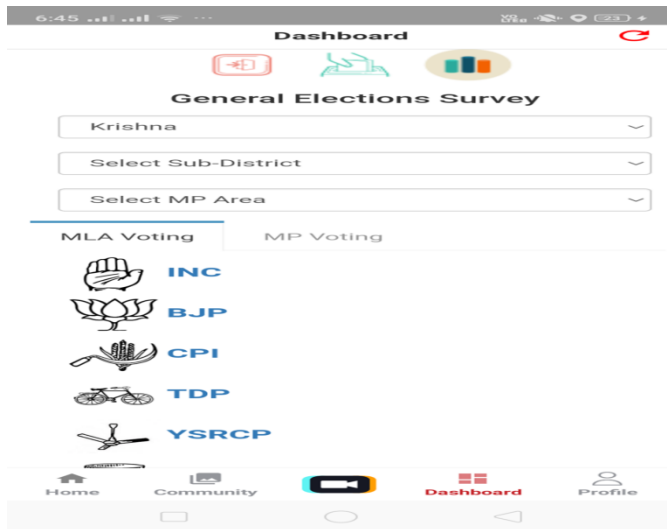

When the user clicks on the dashboard, the window will appear like this, and this window consists of two options: survey voting and digital voting.

4.1. Surveyvoting: -

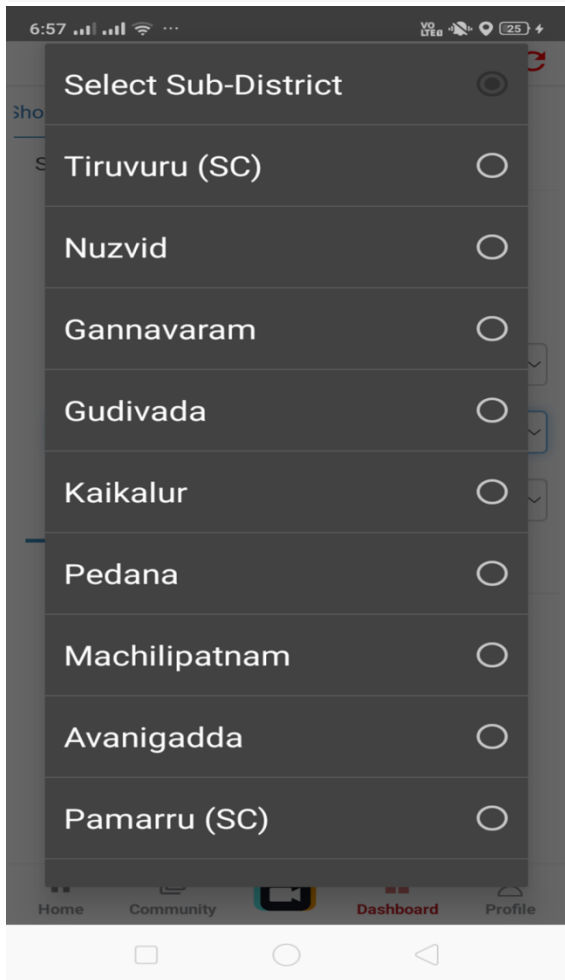

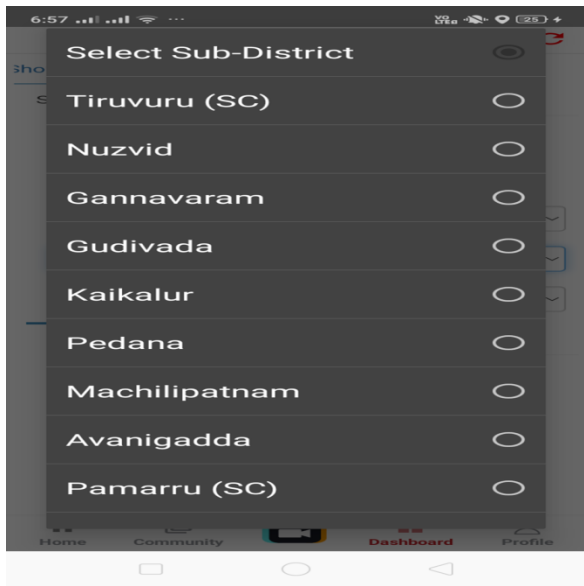

The user can click on the survey voting then he will get a dropdown and he wants to select whatever survey which he wants to vote and click on the survey and he can vote to the survey.

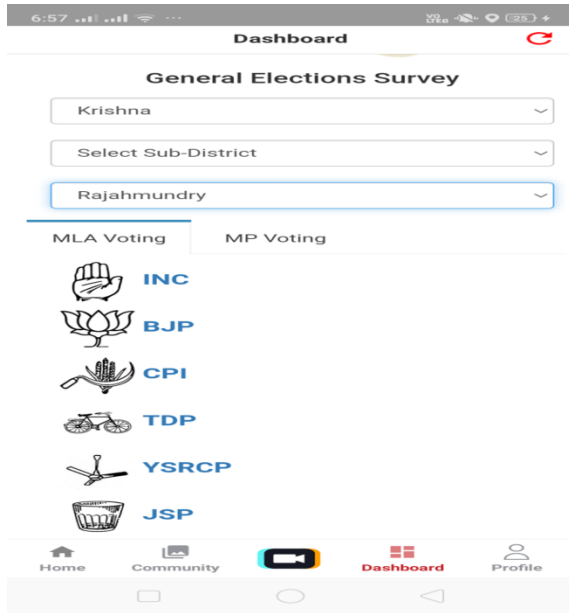

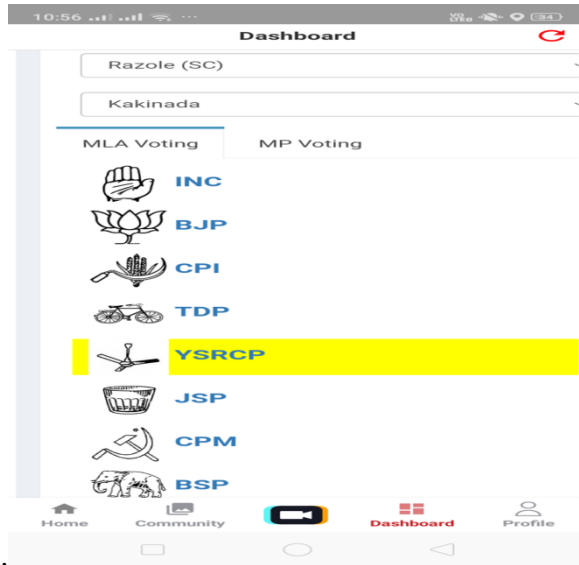

The user can vote in the survey by clicking on the vote icon. Before he clicks, he should select each dropdown present in the voting, and later he should click on the vote option.

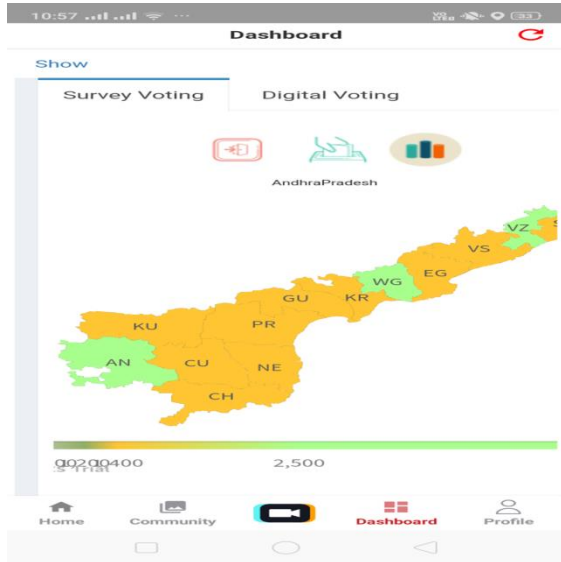

In the application, users typically have the ability to select the political party or candidate they wish to vote for in surveys. Furthermore, the application usually provides a feature that allows users to view the percentage of votes received by each party or candidate in each survey. This data is often presented visually, in the form of a graph or chart, making it easier for users to understand and analyze voting trends and outcomes. These features enhance transparency and

user engagement with the survey results..

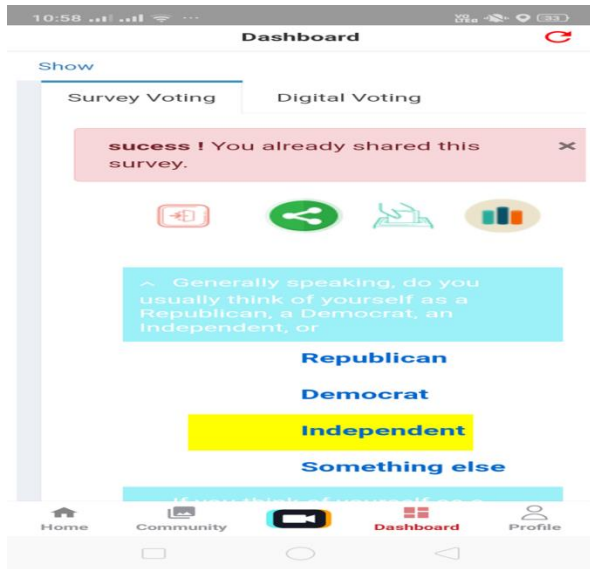

4.1.1. Shareoption: -

Users can typically view their survey results by clicking on the "Share" option, often located at the top of the survey voting tab. This feature allows users to access and share their survey data or findings with others, facilitating communication and collaboration related to the survey's content

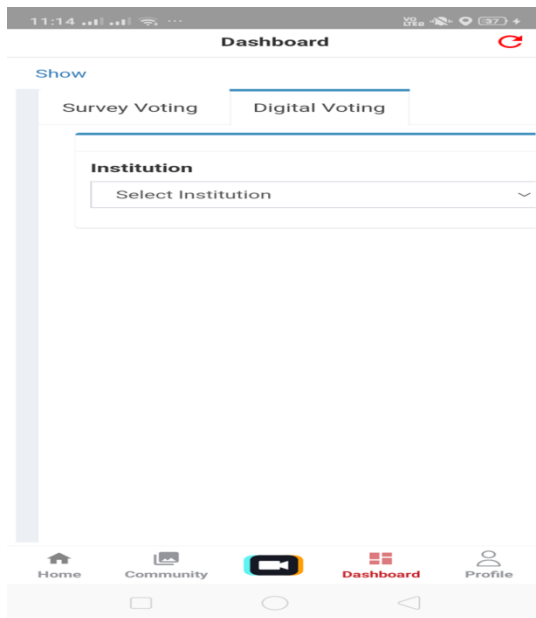

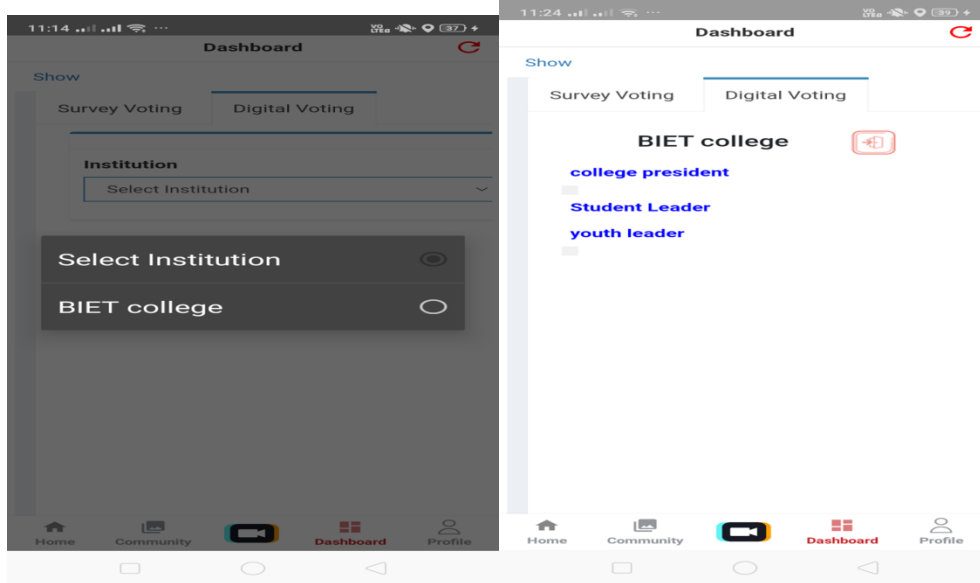

and results.

4.2 Digital Voting: -

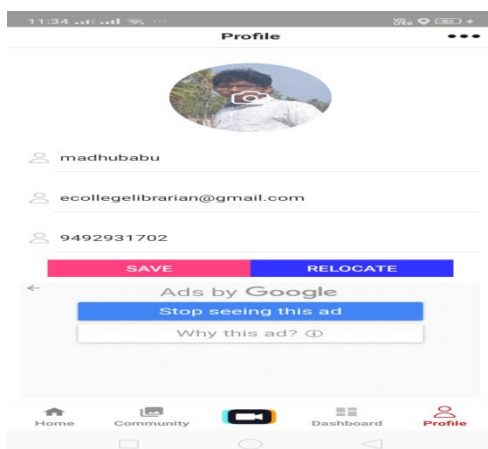

The user can click on the digital voting on the dashboard and later select the institution for which he wants to vote. There is an institution dropdown in the digital voting and you can select the role for which you want to vote.

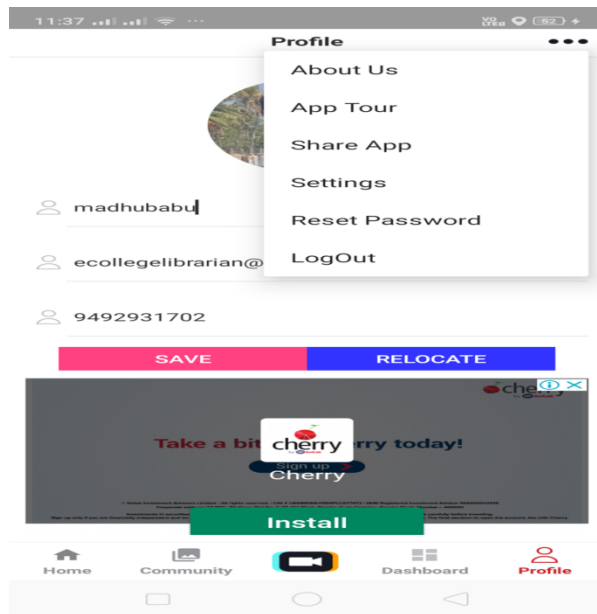

5.Profile: -

Users can usually access and view their profile by clicking on the "Profile" option, typically found on the right side of the home tab or navigation menu. This action allows users to access and manage their profile information, view relevant account details, and make updates as needed within the application..

5.1 Reset password: -

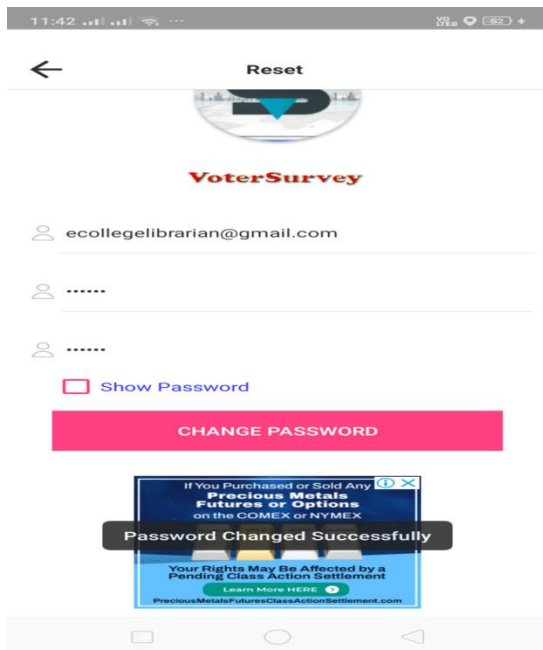

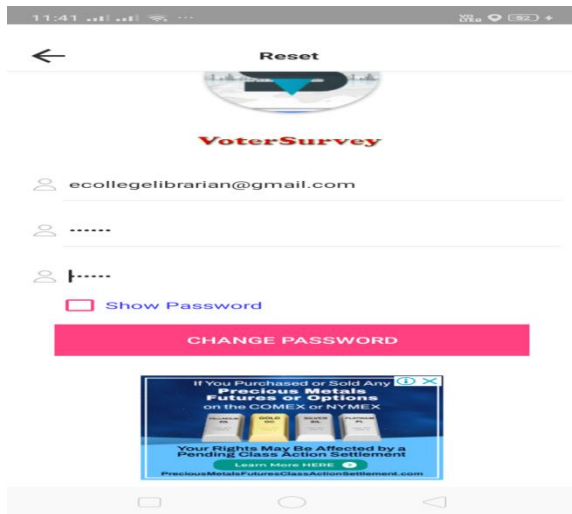

The user can reset their password by clicking on the three dots on the top of the profile page and clicking on the reset password option that was present in it.

To change their password, users typically follow these steps:

1. Enter Old Password: Users provide their current or old password as a security measure to verify their identity.
2. Enter New Password: Users input the new password they want to set for their account.
3. Retype New Password: For confirmation, users re-enter the new password.
4. Click "Change Password": After completing the required fields, users click on the "Change Password" or a similar button to confirm and save the new password.

By following these steps, the user's password is successfully updated within the application, ensuring the security of their account.

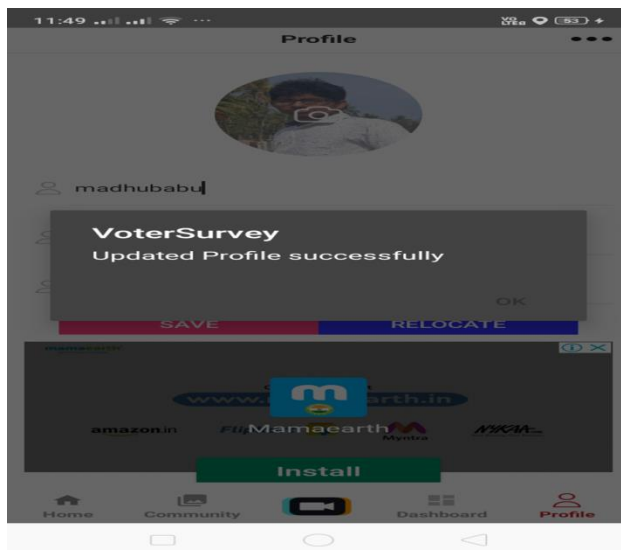

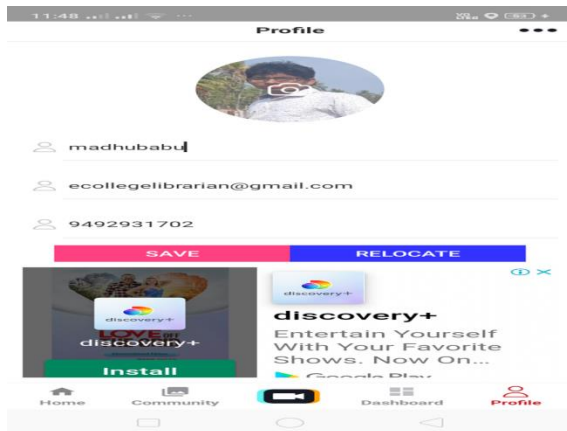

5.2 Edit profile: -

Users can typically edit their profile information within the application by following these steps:

1. Place Cursor on Field: Users place their cursor on the specific field or section they want to edit within their profile.

2. Make Edits: Users make the necessary edits or updates to the information within that field.
3. Click "Save" or a Similar Button: After completing the edits, users click on the "Save" or a similar button to confirm and apply the changes.

This process allows users to easily update their profile information, ensuring that their account details are accurate and up-to-date within the application.

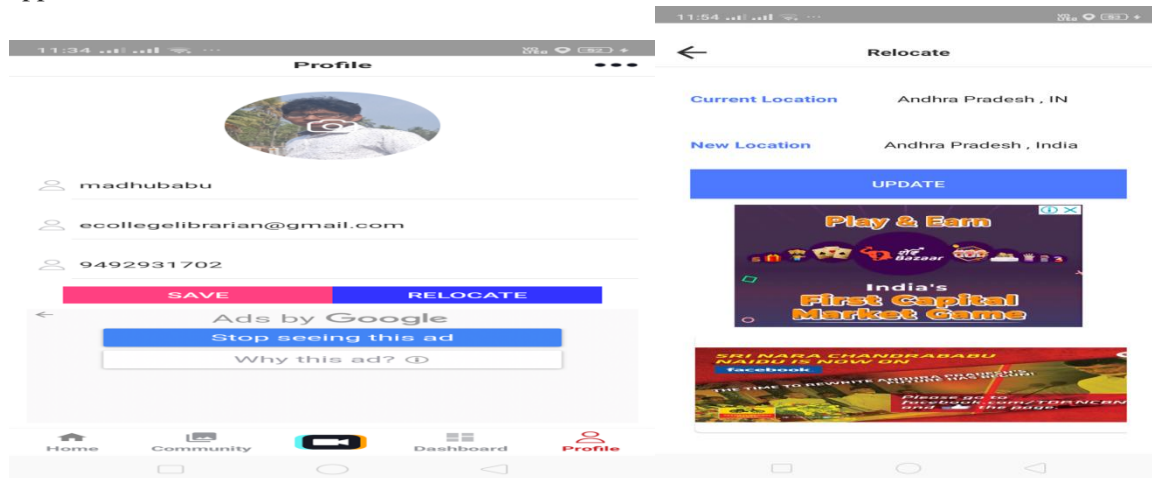

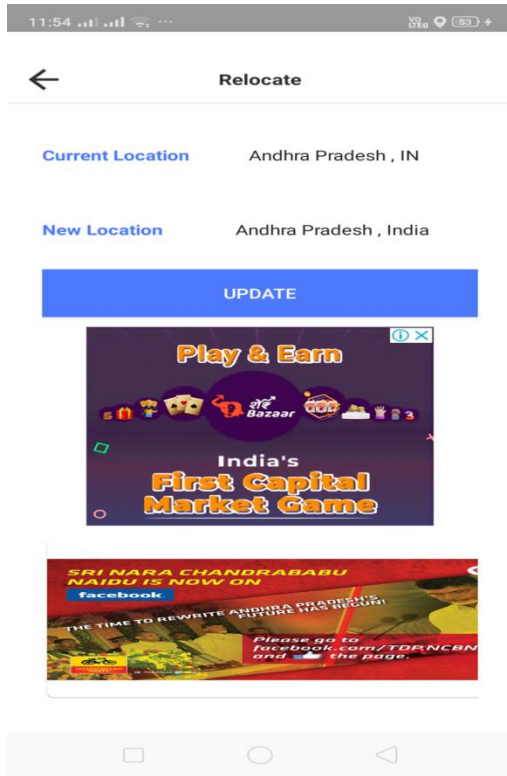

5.3. Relocate: -

To update their location in the application, users typically:

1. Click on the "Relocate" option in their profile.
2. Review their current and new locations.
3. Click "Update" to confirm and apply the location change.

This process allows users to easily keep their profile location information up-to-date within the application.

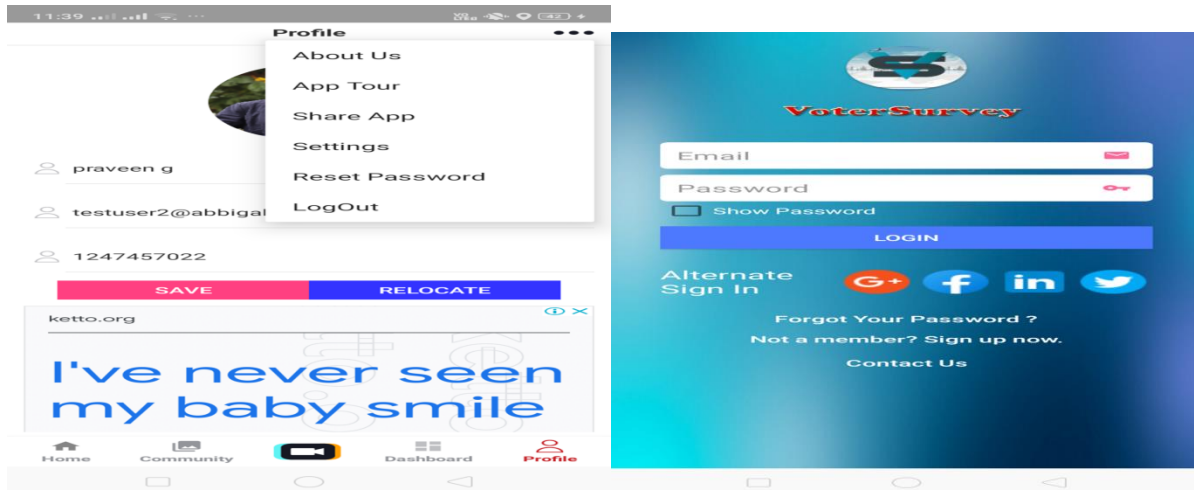

5.4. Logout: -

Users can typically log out from their profile by following these steps:

1. Click on the Three Dots: Users click on the three dots (usually representing a menu or settings) on the right side of the profile tab.
2. Select "Log Out": From the options that appear, users choose the "Log Out" option.

This action typically logs the user out of their account and returns them to the initial login page of the application, ensuring the security of their account when not in use.

THANK YOU
